The extraordinary and wonderful adventures which befall Phileas Fogg and his servant Passepartout when they set out to win a bet by going round the world in eighty days.

### **Protecting the Wild**

This lush book of photography represents National Geographic's Photo Ark, a major cross-platform initiative and lifelong project by photographer Joel Sartore to make portraits of the world's animals-especially those that are endangered. His powerful message, conveyed with humor, compassion, and art- to know these animals is to save them.Sartore intends to photograph every animal in captivity in the world. He is circling the globe, visiting zoos and wildlife rescue centers to create studio portraits of 12,000 species, with an emphasis on those facing extinction. He has photographed more than 6,000 already and now, thanks to a multi-year partnership with National Geographic, he may reach his goal. This book showcases his animal portraits- from tiny to mammoth, from the Florida grasshopper sparrow to the greater one-horned rhinoceros. Paired with the eloquent prose of veteran wildlife writer Douglas Chadwick, this book presents a thought-provoking argument for saving all the species of our planet.

Professor Yurii A. Anan'ev has a long-standing international reputation for his publications on optical beams and resonators. Now many of his contributions will be readily available for the first time in a book. The generation of maximum power, minimum divergence beams from laser resonators is probably the most important topic in quantum electronics and optics today. The only book of its kind, *Laser Resonators and the Beam Divergence Problem* covers not only the theory, but also the applications of resonators to real systems as opposed to idealized models. Each rigorous examination of an optical configuration is accompanied by a detailed discussion of its associated applications and of the considerations for the user in practical work. The book contains a wealth of information on the developments in resonator technology, including much material previously unavailable outside the Soviet Union. It is an essential reference source to every researcher in laser science and technology.

Fiction “[A] remarkable debut novel . . . [Nguyen] brings a distinctive perspective to the war and its aftermath. His book fills a void in the literature, giving voice to the previously voiceless . . . The nameless protagonist-narrator, a memorable character despite his anonymity, is an Americanized Vietnamese with a divided heart and mind. Nguyen’s skill in portraying this sort of ambivalent personality compares favorably with masters like Conrad, Greene, and le Carré. . . . Both thriller and social satire. . . . In its final chapters, *The Sympathizer* becomes an absurdist tour de force that might have been written by a Kafka or Genet.”—Philip Caputo, *New York Times Book Review* (cover review) The winner of the 2016 Pulitzer Prize for Fiction, as well as seven other awards, *The Sympathizer* is the breakthrough novel of the year. With the pace and suspense of a thriller and prose that has been compared to Graham Greene and Saul Bellow, *The Sympathizer* is a sweeping epic of love and betrayal. The narrator, a communist double agent, is a “man of two minds,” a half-French, half-Vietnamese army captain who arranges to come to America after the Fall of Saigon, and while building a new life with other Vietnamese refugees in Los Angeles is secretly reporting back to his communist superiors in Vietnam. *The Sympathizer* is a blistering exploration of identity and America, a gripping espionage novel, and a powerful story of love and friendship.

One of the twentieth century's great undisputed masterpieces, Malcolm Lowry's *Under the Volcano* includes an introduction by Michael Schmidt in Penguin Modern Classics. It is the fiesta 'Day of the Dead' in the small Mexican town of Quauhnahuac. In the shadow of the volcano, ragged children beg coins to buy skulls made of chocolate, ugly pariah dogs roam the streets and Geoffrey Firmin - ex-consul, ex-husband, an alcoholic and a ruined man - is living out the last day of his life. Drowning himself in mescal while his former wife and half-brother look on, powerless to help him, the consul has become an enduring tragic figure. As the day wears on, it becomes apparent that Geoffrey must die. It is his only escape from a world he cannot understand. His story, the image of one man's agonised journey towards Calvary, became a prophetic book for a whole generation. Malcolm Lowry (1909-1957) was born and died in England. Between school and studying English at St Catherine's College, Cambridge he spent five months at sea as a deckhand, an experience which gave him the material for his first novel, *Ultramarine* (1933). After marrying in Paris, he moved to New York where he completed *In Ballast* to

"Tiger-Lilies is actually a somewhat autobiographical book. In it, Lanier analyzes the relationship between a Northerner and a Southerner throughout the Civil War. As a Southerner who had fought for the Confederate army, Lanier had experienced the war firsthand, both on the battlefield and as a prisoner of war. These experiences are recognizable in the battle scenes especially, which are considered some of the most realistic representations of Civil War combat in literature. Ultimately, Tiger-Lilies can be interpreted as an anti-war novel and one of Lanier's less successful endeavors in the course of his career."--The History Engine.

Protected natural areas have historically been the primary tool of conservationists to conserve land and wildlife. These parks and reserves are set apart to forever remain in contrast to those places where human activities, technologies, and developments prevail. But even as the biodiversity crisis accelerates, a growing number of voices are suggesting that protected areas are passé. Conservation, they argue, should instead focus on lands managed for human use—working

landscapes—and abandon the goal of preventing human-caused extinctions in favor of maintaining ecosystem services to support people. If such arguments take hold, we risk losing support for the unique qualities and values of wild, undeveloped nature. Protecting the Wild offers a spirited argument for the robust protection of the natural world. In it, experts from five continents reaffirm that parks, wilderness areas, and other reserves are an indispensable—albeit insufficient—means to sustain species, subspecies, key habitats, ecological processes, and evolutionary potential. Using case studies from around the globe, they present evidence that terrestrial and marine protected areas are crucial for biodiversity and human well-being alike, vital to countering anthropogenic extinctions and climate change. A companion volume to *Keeping the Wild: Against the Domestication of Earth*, *Protecting the Wild* provides a necessary addition to the conversation about the future of conservation in the so-called Anthropocene, one that will be useful for academics, policymakers, and conservation practitioners at all levels, from local land trusts to international NGOs.

Rangelands are large natural landscapes that can include grasslands, shrublands, savannahs and woodlands. They are greatly influenced by, and often dependent on, the action of herbivores. In the majority of rangelands the dominant herbivores are found in domestic herds that are managed by mobile pastoralists. Most pastoralists manage their rangelands communally, benefitting from the greater flexibility and seasonal resource access that common property regimes can offer. As this book shows, this creates a major challenge for governance and institutions. This work improves our understanding of the importance of governance, how it can be strengthened and the principles that underpin good governance, in order to prevent degradation of rangelands and ensure their sustainability. It describes the nature of governance at different levels: community governance, state

governance, international governance, and the unique features of rangelands that demand collective action (issues of scale, ecological disequilibrium and seasonality). A series of country case studies is presented, drawn from a wide spectrum of examples from Africa, the Middle East, Central Asia, Europe and North America. These provide contrasting lessons which are summarised to promote improved governance of rangelands and pastoralist livelihoods.

"You are not born an entrepreneur. It's a skill that you learn along the way." When the skincare company Rodial launched its cult 'snake' serum, the press quickly called the business an 'overnight success'. However, Rodial's founder Maria Hatzistefanis had been toiling for 18 years, building the company from scratch in her bedroom. Now, the beauty boss sets out to demonstrate in this very accessible book that its success stemmed from sheer hard work, tireless efforts and a lot of patience. Fashion-loving Maria set out with a dream to build a beauty business and - despite not excelling at school, and being fired from her first job - she has achieved it. She did it by dreaming big, working hard, surrounding herself with the best, taking risks, creating buzz and building her own personal brand, which is now a favourite with high-profile models and media personalities including Poppy Delevingne, Daisy Lowe and Kylie Jenner. Crucially, she believes anyone can do this and her book, brimming with good sense, great advice, tips and secrets - all presented in an easy, friendly style - shows how.

There is currently no basic text in wildlife law suitable for the wide range of courses in wildlife conservation and animal welfare at both bachelors and masters level, or for the large number of people who work in conservation and animal welfare; The Laws Protecting Animals and Ecosystems fills the gap in this significant market for a basic law text applicable to students and professionals whose primary training is in biology but who require a basic understanding of the laws relating to the protection of animals and ecosystems. The text is applicable to a wide range of subjects, including wildlife conservation, animal handling, animal welfare, animal husbandry, and veterinary science. This foundational text supports those studying animal and ecosystem law by providing an overview of the basic legal principles, national and international laws, terminology, the legal mechanisms used to protect animals and ecosystems, and a compendium of the major animal welfare and conservation laws in major English speaking countries. Dr. Rees has been teaching wildlife law for 20 years and ecology for over 35 years and is ideally placed to write this book.

Women's novels have traditionally been read as 'subjective'. Through an examination of three generations of women's fiction in the post-Romantic period, this book challenges traditional readings of women's novels and argues that fiction writing for women has often been a matter of self-erasure rather than self-inscription. In particular, it examines the changing strategies, sometimes collusive and sometimes rebellious, which Charlotte Bronte, Olive Schreiner and Katherine Mansfield employed in their tentative project of inscribing female subjectivity into the novel and story form.

A ROLLICKING NARRATIVE HISTORY OF THEODORE ROOSEVELT'S EMBATTLED TENURE AS POLICE COMMISSIONER OF CORRUPT, PLEASURE-LOVING NEW YORK CITY IN THE 1880s, AND HIS DOOMED MISSION TO WIPE OUT VICE In the 1890s, New York City was America's financial, manufacturing, and entertainment capital, and also its preferred destination for sin, teeming with 40,000 prostitutes, glittering casinos, and all-night dives packed onto the island's two dozen square miles. Police captains took hefty bribes to see nothing while reformers writhed in frustration. In *Island of Vice*, bestselling author Richard Zacks paints a vivid picture of the lewd underbelly of 1890s New York, and of Theodore Roosevelt, the cocksure crusading police commissioner who resolved to clean up the bustling metropolis, where the silk top hats of Wall Street bobbed past teenage prostitutes trawling Broadway. Writing with great wit and zest, Zacks explores how Roosevelt went head-to-head with corrupt Tammany Hall, took midnight rambles with muckraker Jacob Riis, banned barroom drinking on Sundays, and tried to convince 2 million New Yorkers to enjoy wholesome family fun. In doing so, Teddy made a ruthless enemy of police captain "Big Bill" Devery, who grew up in the Irish slums and never tired of fighting "tin soldier" reformers. Roosevelt saw his mission as a battle of good versus evil; Devery saw prudery standing in the way of fun and profit. When righteous Roosevelt's vice crackdown started to succeed all too well, many of his own supporters began to turn on him. Cynical newspapermen mocked his quixotic quest, his own political party abandoned him, and Roosevelt discovered that New York loves its sin more than its salvation. Zacks's meticulous

research and wonderful sense of narrative verve bring this disparate cast of both pious and bawdy New Yorkers to life. With cameos by Stephen Crane, J. P. Morgan, and Joseph Pulitzer, plus a horde of very angry cops, *Island of Vice* is an unforgettable portrait of turn-of-the-century New York in all its seedy glory, and a brilliant portrayal of the energetic, confident, and zealous Roosevelt, one of America's most colorful public figures.
