In today's business world, there is an enormous gap between how leaders are supposed to act versus how they actually act. As a leader, where do you fall on the spectrum? In his debut book, John Slone teaches readers about discovering one's Hidden You and using it to become the best leader possible. Before you can successfully lead others, you must first discover both the physiological and psychological attributes that make you, you. Every leader needs a systematic approach to successfully lead while taking into consideration the complexities of human behavior and the innate survival instincts that are consciously and subconsciously invoked in every human interaction. Only by understanding this can you begin your leadership evolution and embark on a journey toward leadership transcendence.

Vivian Paley presents a moving personal account of her experiences teaching kindergarten in an integrated school within a predominantly white, middle-class neighborhood. In a new preface, she reflects on the way that even simple terminology can convey unintended meanings and show a speaker's blind spots. She also vividly describes what her readers have taught her over the years about herself as a "white teacher."

Cold and ultracold collisions occupy a strategic position at the intersection of several powerful themes of current research in chemical physics, in atomic, molecular and optical physics, and even in condensed matter. The nature of these collisions has important consequences for optical manipulation of inelastic and reactive processes, precision measurement of molecular and atomic properties, matter-wave coherences and quantum-statistical condensates of dilute, weakly interacting atoms. This crucial position explains the wide interest and explosive growth of the field since its inception in 1987. The author reviews elements of the quantum theory of scattering theory, collisions taking place in the presence of one or more light fields, and collisions in the dark, below the photon recoil limit imposed by the presence of any light field. Finally, it reviews the essential properties of these mesoscopic quantum systems and describes the key importance of the scattering length to condensate stability.

Cold and Ultracold Collisions in Quantum Microscopic and Mesoscopic Systems

The Muhammad cartoon crisis of 2005–2006 in Denmark caught the world by surprise as the growing hostilities toward Muslims had not been widely noticed. Through the methodologies of media anthropology, cultural studies, and communication studies, this book brings together more than thirteen years of research on three significant historical media events in order to show the drastic changes and emerging fissures in Danish society and to expose the politicization of Danish news journalism, which has consequences for the political representation and everyday lives of ethnic minorities in Denmark.

Manual Handling at Work

"This study was widely acclaimed as the first definitive analysis of the disintegration of Pakistan and the birth of Bangladesh. It presents a scholarly explanation of why the policies of the Pakistani ruling elites, especially the policies and institutional innovations of the Ayub regime (1958 - 1968), which often seemed so promising to observers abroad, were in fact the prelude to the break up of Pakistan. The study shows that by emphasizing state building and economic growth and de-emphasizing nation building and development of political institutions, the Ayub regime created a crisis in political management. The Pakistani ruling elites' persistent refusal to allow democratic political institutions to function resulted in the exclusion of Bengalis from the national decision making process. The denial of their just claims led Bengalis to fight for autonomy initially and ultimately for independence." "The book, first published in 1972 by Columbia University Press, is being reprinted as part of UPL's Road to Bangladesh series. It will be of use to the new generation of readers to refresh memories about the failed policies and politics of the Pakistani ruling elites and the vision of democratic and secular politics for which the nationalist struggle was waged in Bangladesh."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc.
