Forging a Laboring Race foregrounds the working black body as both a category of analysis and lived experience. “How does it feel to be a problem?” asked W.E.B. DuBois in *The Souls of Black Folk*. For many thinkers across the color line, the “Negro problem” was inextricably linked to the concurrent “labor problem,” occasioning debates regarding blacks’ role in the nation’s industrial past, present and future. With blacks freed from the seemingly protective embrace of slavery, many felt that the ostensibly primitive Negro was doomed to expire in the face of unbridled industrial progress. Yet efforts to address the so-called “Negro problem” invariably led to questions regarding the relationship between race, industry and labor writ large. In consequence, a collection of thinkers across the natural and social sciences developed a new culture of racial management, linking race and labor to color and the body. Evolutionary theory and industrial management combined to identify certain peoples with certain forms of work and reconfigured the story of races into one of development and decline, efficiency and inefficiency, and the thin line between civilization and savagery. *Forging a Laboring Race* charts the history of an idea—race management—building on recent work in African American, labor, and disability history to analyze how ideas of race, work, and the “fit” or “unfit” body informed the political economy of early twentieth-century industrial America.

Unfit for the Future

Online Library Unfit For The Future The Need For Moral Enhancement Uehiro Series In Practical Ethics

A practical approach to business transformation Fit for Growth* is a unique approach to business transformation that explicitly connects growth strategy with cost management and organization restructuring. Drawing on 70-plus years of strategy consulting experience and in-depth research, the experts at PwC's Strategy& lay out a winning framework that helps CEOs and senior executives transform their organizations for sustainable, profitable growth. This approach gives structure to strategy while promoting lasting change. Examples from Strategy&'s hundreds of clients illustrate successful transformation on the ground, and illuminate how senior and middle managers are able to take ownership and even thrive during difficult periods of transition. Throughout the Fit for Growth process, the focus is on maintaining consistent high-value performance while enabling fundamental change. Strategy& has helped major clients around the globe achieve significant and sustained results with its research-backed approach to restructuring and cost reduction. This book provides practical guidance for leveraging that expertise to make the choices that allow companies to: Achieve growth while reducing costs Manage transformation and transition productively Create lasting competitive advantage Deliver reliable, high-value performance Sustainable success is founded on efficiency and high performance. Companies are always looking to do more with less, but their efforts often work against them in the long run. Total business transformation requires total buy-in, and it entails a series of decisions that must not be made lightly. The Fit for Growth approach provides a clear strategy and practical framework for growth-oriented change, with

Online Library Unfit For The Future The Need For Moral Enhancement Uehiro Series In Practical Ethics

expert guidance on getting it right. *Fit for Growth is a registered service mark of PwC Strategy& Inc. in the United States

Fit to be Citizens?

The bestselling author of *The Willpower Instinct* introduces a surprising science-based book that doesn't tell us why we should exercise but instead shows us how to fall in love with movement. Exercise is health-enhancing and life-extending, yet many of us feel it's a chore. But, as Kelly McGonigal reveals, it doesn't have to be. Movement can and should be a source of joy. Through her trademark blend of science and storytelling, McGonigal draws on insights from neuroscience, psychology, anthropology, and evolutionary biology, as well as memoirs, ethnographies, and philosophers. She shows how movement is intertwined with some of the most basic human joys, including self-expression, social connection, and mastery--and why it is a powerful antidote to the modern epidemics of depression, anxiety, and loneliness. McGonigal tells the stories of people who have found fulfillment and belonging through running, walking, dancing, swimming, weightlifting, and more, with examples that span the globe, from Tanzania, where one of the last hunter-gatherer tribes on the planet live, to a dance class at Juilliard for people with Parkinson's disease, to the streets of London, where volunteers combine fitness and community service, to races in the remote wilderness, where athletes push the limits of what a human can endure. Along the way, McGonigal

Online Library Unfit For The Future The Need For Moral Enhancement Uehiro Series In Practical Ethics

paints a portrait of human nature that highlights our capacity for hope, cooperation, and self-transcendence. The result is a revolutionary narrative that goes beyond familiar arguments in favor of exercise, to illustrate why movement is integral to both our happiness and our humanity. Readers will learn what they can do in their own lives and communities to harness the power of movement to create happiness, meaning, and connection.

Unfit to Be a Slave

Carlson's history of degeneracy theory, the idea that certain people are biologically disposed to become socially unfit or "degenerate," examines the birth of both good and bad eugenics movements. While good eugenics movements focus on people whose needs may require intense social attention and expensive social investments, bad eugenics movements call for isolation if not eradication and genocide. He brings the history into the present day, where the potential misapplication of DNA science and social attitudes toward the human genome could lead to similar movements.

The Lost Book of Adana Moreau

Washington Post national investigative reporter Carol Leonnig and White House

Online Library Unfit For The Future The Need For Moral Enhancement Uehiro Series In Practical Ethics

bureau chief Philip Rucker, both Pulitzer Prize winners, provide the definitive insider narrative of Donald Trump's unique presidency with shocking new reporting and insight into its implications. "I alone can fix it." So went Donald J. Trump's march to the presidency on July 21, 2016, when he accepted the Republican presidential nomination in Cleveland, promising to restore what he described as a fallen nation. Yet over the subsequent years, as he has undertaken the actual work of the commander in chief, it has been hard to see beyond the daily chaos of scandal, investigation, and constant bluster. It would be all too easy to mistake Trump's first term for one of pure and uninhibited chaos, but there were patterns to his behavior and that of his associates. The universal value of the Trump administration is loyalty - not to the country, but to the president himself - and Trump's North Star has been the perpetuation of his own power, even when it meant imperiling our shaky and mistrustful democracy. Leonnig and Rucker, with deep and unmatched sources throughout Washington, D.C., tell of rages and frenzies but also moments of courage and perseverance. Relying on scores of exclusive new interviews with some of the most senior members of the Trump administration and other firsthand witnesses, the authors reveal the forty-fifth president up close, taking readers inside Robert Mueller's Russia investigation as well as the president's own hap-hazard but ultimately successful legal defense. Here for the first time certain officials who have felt honor-bound not to publicly criticize a sitting president or to divulge what they witnessed in a position of trust tell the truth for the benefit of history. This peerless and gripping narrative reveals

Online Library Unfit For The Future The Need For Moral Enhancement Uehiro Series In Practical Ethics

President Trump at his most unvarnished and exposes how decision making in his administration has been driven by a reflexive logic of self-preservation and self-aggrandizement - but a logic nonetheless. This is the story of how an unparalleled president has scrambled to survive and tested the strength of America's democracy and its common heart as a nation.

Forging a Laboring Race

Climate change: it is arguably the most urgent and consequential issue humankind has ever faced. How we address it in the next thirty years will determine the kind of world we will live in and will bequeath to our children and to theirs. In *The Future We Choose*, Christiana Figueres and Tom Rivett-Carnac--who led negotiations for the United Nations during the historic Paris Agreement of 2015--have written a cautionary but optimistic book about the world's changing climate and the fate of humanity. The authors outline two possible scenarios for our planet. In one, they describe what life on Earth will be like by 2050 if we fail to meet the Paris climate targets. In the other, they lay out what it will be like to live in a carbon neutral, regenerative world. They argue for confronting the climate crisis head-on, with determination and optimism. *The Future We Choose* presents our options and tells us what governments, corporations, and each of us can and must do to fend off disaster.

Enhancing Human Capacities

Out of over 40 years of experience in adult or worker education, David Greene brings us tools to develop consciousness and leadership for social change. Based on the power of our huge working class to understand this economic system and to organize, this book aims to empower educators, students and other workers with science applied to solving the serious social problems we face today. We are confronted with the issues of low-wage, part-time and temporary jobs, inadequate housing, health care, and transportation, inequality and injustice, at the same time as the greatest concentration of wealth in human history. The disparity of wealth and control has never been greater. The only way out of this deepening crisis is through education. To change this we need understanding that is based on the clearest reflection of the real world. *Unfit to Be a Slave* employs the tools of theory and informed practice, to guide us to create spaces to share experience, study history's lessons and develop consciousness. As a collective and organized force we can transform our communities, our countries and our world. Mythologies that tell people, 'Things don't change,' 'We can't do anything,' or 'It has always been this way,' prevent poor and working class populations from taking necessary action on behalf of their own lives and families. *Unfit to Be a Slave* is meant to be a guide to education for social change.

Educating the Student Body

The increased military employment of remotely operated aerial vehicles, also known as drones, has raised a wide variety of important ethical questions, concerns, and challenges. Many of these have not yet received the serious scholarly examination such worries rightly demand. This volume attempts to fill that gap through sustained analysis of a wide range of specific moral issues that arise from this new form of killing by remote control. Many, for example, are troubled by the impact that killing through the mediated mechanisms of a drone half a world away has on the pilots who fly them. What happens to concepts such as bravery and courage when a war-fighter controlling a drone is never exposed to any physical danger? This dramatic shift in risk also creates conditions of extreme asymmetry between those who wage war and those they fight. What are the moral implications of such asymmetry on the military that employs such drones and the broader questions for war and a hope for peace in the world going forward? How does this technology impact the likely successes of counter-insurgency operations or humanitarian interventions? Does not such weaponry run the risk of making war too easy to wage and tempt policy makers into killing when other more difficult means should be undertaken? Killing By Remote Control directly engages all of these issues. Some essays discuss the just war tradition and explore whether the rise of drones necessitates a shift in the ways we think about the ethics of war in the broadest sense. Others scrutinize more specific uses of drones, such as their

Online Library Unfit For The Future The Need For Moral Enhancement Uehiro Series In Practical Ethics

present use in what are known as "targeted killing" by the United States. The book similarly tackles the looming prospect of autonomous drones and the many serious moral misgivings such a future portends. "A path-breaking volume! BJ Strawser, an internationally known analyst of drone ethics, has assembled a broad spectrum of civilian and military experts to create the first book devoted to this hot-button issue. This important work represents vanguard thinking on weapon systems that make headlines nearly every day. It will catalyze debates policy-makers and military leaders must have in order to preserve peace and protect the innocent. - James Cook, Department Chair/Head of Philosophy, US Air Force Academy "The use of 'drones' (remotely piloted air vehicles) in war has grown exponentially in recent years. Clearly, this evolution presages an enormous explosion of robotic vehicles in war - in the air, on the ground, and on and under the sea. This collection of essays provides an invaluable contribution to what promises to be one of the most fundamental challenges to our assumptions about ethics and warfare in at least the last century. The authors in this anthology approach the ethical challenges posed by these rapidly advancing technologies from a wide range of perspectives. Cumulatively, they represent an essential overview of the fundamental ethical issues involved in their development. This collection makes a key contribution to an urgently needed dialogue about the moral questions involved." - Martin L. Cook, Adm. James B. Stockdale Professor of Professional Military Ethics, Professor Leadership & Ethics, College of Operational & Strategic Leadership, U.S. Naval War College

A Very Stable Genius

Unfit for the Future argues that the future of our species depends on radical enhancement of the moral aspects of our nature. Population growth and technological advances are threatening to undermine the conditions of worthwhile life on earth forever. We need to modify the biological bases of human motivation to deal with this challenge.

Unfit for Purpose

Physical inactivity is a key determinant of health across the lifespan. A lack of activity increases the risk of heart disease, colon and breast cancer, diabetes mellitus, hypertension, osteoporosis, anxiety and depression and others diseases. Emerging literature has suggested that in terms of mortality, the global population health burden of physical inactivity approaches that of cigarette smoking. The prevalence and substantial disease risk associated with physical inactivity has been described as a pandemic. The prevalence, health impact, and evidence of changeability all have resulted in calls for action to increase physical activity across the lifespan. In response to the need to find ways to make physical activity a health priority for youth, the Institute of Medicine's Committee on Physical Activity and Physical Education in the School Environment was formed. Its purpose

Online Library Unfit For The Future The Need For Moral Enhancement Uehiro Series In Practical Ethics

was to review the current status of physical activity and physical education in the school environment, including before, during, and after school, and examine the influences of physical activity and physical education on the short and long term physical, cognitive and brain, and psychosocial health and development of children and adolescents. Educating the Student Body makes recommendations about approaches for strengthening and improving programs and policies for physical activity and physical education in the school environment. This report lays out a set of guiding principles to guide its work on these tasks. These included: recognizing the benefits of instilling life-long physical activity habits in children; the value of using systems thinking in improving physical activity and physical education in the school environment; the recognition of current disparities in opportunities and the need to achieve equity in physical activity and physical education; the importance of considering all types of school environments; the need to take into consideration the diversity of students as recommendations are developed. This report will be of interest to local and national policymakers, school officials, teachers, and the education community, researchers, professional organizations, and parents interested in physical activity, physical education, and health for school-aged children and adolescents.

Annals of the American Academy of Political and Social Science

Out of over 40 years of experience in adult or worker education, David Greene

Online Library Unfit For The Future The Need For Moral Enhancement Uehiro Series In Practical Ethics

brings us tools to develop consciousness and leadership for social change. Based on the power of our huge working class to understand this economic system and to organize, this book aims to empower educators, students and other workers with science applied to solving the serious social problems we face today. We are confronted with the issues of low-wage, part-time and temporary jobs, inadequate housing, health care, and transportation, inequality and injustice, at the same time as the greatest concentration of wealth in human history. The disparity of wealth and control has never been greater. The only way out of this deepening crisis is through education. Tramps, Unfit Mothers, and Neglected Children

As this bestseller predicted, Trump has only grown more erratic and dangerous as the pressures on him mount. This new edition includes new essays bringing the

Online Library Unfit For The Future The Need For Moral Enhancement Uehiro Series In Practical Ethics

book up to date—because this is still not normal. Originally released in fall 2017, *The Dangerous Case of Donald Trump* was a runaway bestseller. Alarmed Americans and international onlookers wanted to know: What is wrong with him? That question still plagues us. The Trump administration has proven as chaotic and destructive as its opponents feared, and the man at the center of it all remains a cipher. Constrained by the APA's "Goldwater rule," which inhibits mental health professionals from diagnosing public figures they have not personally examined, many of those qualified to weigh in on the issue have shied away from discussing it at all. The public has thus been left to wonder whether he is mad, bad, or both. The prestigious mental health experts who have contributed to the revised and updated version of *The Dangerous Case of Donald Trump* argue that their moral and civic "duty to warn" supersedes professional neutrality. Whatever affects him, affects the nation: From the trauma people have experienced under the Trump administration to the cult-like characteristics of his followers, he has created unprecedented mental health consequences across our nation and beyond. With eight new essays (about one hundred pages of new material), this edition will cover the dangerous ramifications of Trump's unnatural state. It's not all in our heads. It's in his.

Good Italy, Bad Italy

An argument that achieving millennial life spans or monumental intellects will

Online Library Unfit For The Future The Need For Moral Enhancement Uehiro Series In Practical Ethics

destroy values that give meaning to human lives. Proposals to make us smarter than the greatest geniuses or to add thousands of years to our life spans seem fit only for the spam folder or trash can. And yet this is what contemporary advocates of radical enhancement offer in all seriousness. They present a variety of technologies and therapies that will expand our capacities far beyond what is currently possible for human beings. In *Humanity's End*, Nicholas Agar argues against radical enhancement, describing its destructive consequences. Agar examines the proposals of four prominent radical enhancers: Ray Kurzweil, who argues that technology will enable our escape from human biology; Aubrey de Grey, who calls for anti-aging therapies that will achieve “longevity escape velocity”; Nick Bostrom, who defends the morality and rationality of enhancement; and James Hughes, who envisions a harmonious democracy of the enhanced and the unenhanced. Agar argues that the outcomes of radical enhancement could be darker than the rosy futures described by these thinkers. The most dramatic means of enhancing our cognitive powers could in fact kill us; the radical extension of our life span could eliminate experiences of great value from our lives; and a situation in which some humans are radically enhanced and others are not could lead to tyranny of posthumans over humans.

Unfit to Practice

On September 5, 2018, the New York Times published a bombshell essay and took

Online Library Unfit For The Future The Need For Moral Enhancement Uehiro Series In Practical Ethics

the rare step of granting its writer anonymity. Described only as "a senior official in the Trump administration," the author provided eyewitness insight into White House chaos, administration instability, and the people working to keep Donald Trump's reckless impulses in check. With the 2020 election on the horizon, Anonymous is speaking out once again. In this book, the original author pulls back the curtain even further, offering a first-of-its-kind look at the president and his record -- a must-read before Election Day. It will surprise and challenge both Democrats and Republicans, motivate them to consider how we judge our nation's leaders, and illuminate the consequences of re-electing a commander in chief unfit for the role. This book is a sobering assessment of the man in the Oval Office and a warning about something even more important -- who we are as a people.

The Evolution of Moral Progress

There are few fit healthy lifestyle consultants with over 40-years' experience willing to give up programming trade secrets at the expense of losing clients and revenues. I've been on a mission to expose the half-truths and lies within the fitness, health, big-pharma, agriculture, sports, and diet and celebrity industries including government and why they don't want this information as common consumer knowledge. To reveal it is considered taboo by my colleagues and unwelcomed by the marketplace. However I can't sit idly by and watch the charlatans put the next generation's health at risk for the sake of profit. My only

Online Library Unfit For The Future The Need For Moral Enhancement Uehiro Series In Practical Ethics

regret, taking so long to write the book. After each chapter I relate my mobility and pain depression challenges after being diagnosed with Avascular Necrosis (AVN) bone disease. That's right, through my immobility adversity misfortune you also learn how to apply a customized fit healthy habit program to live life to the fullest regardless of ailment. This timeless and incredible consumer safety information is for anyone who wants to get fit, feel well and look good at any age. It also includes educational ill-health prevention and community recreation concepts to "Save the Next Generation's Children from obesity and related disease."

The Mis-education of the Negro

A vivid political history of the schemes, plots, maneuvers, and conspiracies that have attempted--successfully and not--to remove unwanted presidents To limit executive power, the founding fathers created fixed presidential terms of four years, giving voters regular opportunities to remove their leaders. Even so, Americans have often resorted to more dramatic paths to disempower the chief executive. The American presidency has seen it all, from rejecting a sitting president's renomination bid and undermining their authority in office to the more drastic methods of impeachment, and, most brutal of all, assassination. How to Get Rid of a President showcases the political dark arts in action: a stew of election dramas, national tragedies, and presidential departures mixed with party intrigue, personal betrayal, and backroom shenanigans. This briskly paced, darkly humorous

Online Library Unfit For The Future The Need For Moral Enhancement Uehiro Series In Practical Ethics

voyage proves that while the pomp and circumstance of presidential elections might draw more attention, the way that presidents are removed teaches us much more about our political order.

Becoming RBG

Not long ago Italy was Europe's highly touted emerging economy, a society that blended dynamism and super-fast growth with a lifestyle that was the envy of all. Now it is viewed as a major threat to the future of the Euro, indeed to the European Union as a whole. Italy's political system is shorn of credibility as it struggles to deal with huge public debts and anemic levels of economic growth. Young people are emigrating in droves, frustrated at the lack of opportunity, while older people stubbornly cling to their rights and privileges, fearful of an uncertain future. In this lively, up-to-the-minute book, Bill Emmott explains how Italy sank to this low point, how Italians feel about it, and what can be done to return the country to more prosperous and more democratic times. With the aid of numerous personal interviews, Emmott analyzes "Bad Italy"—the land of disgraced Prime Minister Silvio Berlusconi, an inadequate justice system, an economy dominated by special interests and continuing corruption—against its contrasting foil "Good Italy," the home of enthusiastic entrepreneurs, truth-seeking journalists, and countless citizens determined to end mafia domination for good.

Not Fit for Our Society

Asked if the country was governed by a republic or a monarchy, Benjamin Franklin replied, “A republic, if you can keep it.” Since its founding, Americans have worked hard to nurture and protect their hard-won democracy. And yet few consider the role of constitutional law in America’s survival. In *Unfit for Democracy*, Stephen Gottlieb argues that constitutional law without a focus on the future of democratic government is incoherent—illogical and contradictory. Approaching the decisions of the Roberts Court from political science, historical, comparative, and legal perspectives, Gottlieb highlights the dangers the court presents by neglecting to interpret the law with an eye towards preserving democracy. A senior scholar of constitutional law, Gottlieb brings a pioneering will to his theoretical and comparative criticism of the Roberts Court. The Roberts Court decisions are not examined in a vacuum but instead viewed in light of constitutional politics in India, South Africa, emerging Eastern European nations, and others. While constitutional decisions abroad have contributed to both the breakdown and strengthening of democratic politics, decisions in the Roberts Court have aggravated the potential destabilizing factors in democratic governments. Ultimately, *Unfit for Democracy* calls for an interpretation of the Constitution that takes the future of democracy seriously. Gottlieb warns that the Roberts Court’s decisions have hurt ordinary Americans economically, politically, and in the criminal process. They have damaged the historic American melting pot, increased the risk of anti-democratic

Online Library Unfit For The Future The Need For Moral Enhancement Uehiro Series In Practical Ethics

paramilitaries, and clouded the democratic future.

Humanity's End

When Sarah left her home in North Carolina, she had two goals in mind: get answers about her mother and get her man. Unfortunately, no one seems to want to cooperate. Working side by side with Dermot Sinclair she throws temptation in his way every chance she gets. But something is always holding him back. So, Sarah devotes her time to researching the mysterious Highland village where her parents met. Of course, she can't find it on any map and her so-called gift can't help her. She has to turn to folklore for clues. Meanwhile, Sarah is being pursued relentlessly by Scotland's most eligible bachelor, James Stuart whose generous gifts and lavish attention may prove irresistible. All Dermot wants to do is keep the women he loves safe, but he is torn between Sarah and the needs of his ailing mother. Watching his childhood friend, James attempt to romance the woman he loves may be more than he can take.

Unfit Subjects

"Peter Schrag is the model for all political writers. He is committed, passionate, and eloquent, but always stays harnessed to the facts and rooted in the realities of

Online Library Unfit For The Future The Need For Moral Enhancement Uehiro Series In Practical Ethics

politics and human nature. He reports out everything, and he writes like a dream. We can be grateful that in *Not Fit for Our Society* he has turned his gifts to the seemingly intractable problem of immigration. We will have to settle this issue again, as we always manage to do despite enormous commotion and anxiety. Schrag will force everyone to think more clearly and to approach immigration with both compassion and good sense."—EJ Dionne, Jr., author of *Souled Out* "Just who is fit to be part of the society that became a nation in 1776 and who decides, and on what basis? In *Not Fit for Our Society*, Peter Schrag offers an invigorating, well-informed, carefully reasoned investigation into today's immigration debates."—David Hollinger, President of the Organization of American Historians, 2010-2011 "Peter Schrag has a unique view of the immigration debate and policies that have shaped our country since it's founding. His very timely writing of *Not Fit for our Society* helps us to better understand how the immigration debate and politics have gotten us to where we are today. His insights and intellect on the subject give all of us much to think about as we move forward on this very important issue."—Doris O. Matsui, Member of Congress "Peter Schrag has done it again. A sweeping review that puts the ferocity of our current immigration debate in historical context, *Not Fit for Our Society* is a must-read for those hoping to get past talk-show rhetoric and cherry-picked facts. Uncovering the dark impulses that have long undergirded nativist thought, he argues that we have seen this before—and that America will be better if we see through it again."—Manuel Pastor, University of Southern California "Peter Schrag offers a lively and

Online Library Unfit For The Future The Need For Moral Enhancement Uehiro Series In Practical Ethics

thoughtful reinterpretation of America's ambivalence about immigration and immigrants' place in the nation's life. Drawing on his reading of primary sources and the latest scholarship, he tells a story rich in irony, detail, and nuance, tracing the history of nativism from the earliest days of the Republic to the current debates over immigration reform. The book is particularly striking for the way that it connects the arguments and organizations of the current anti-immigration movement to their roots in the eugenics movement and pseudo-scientific racism of the early 20th century."—Mark Paul, New America Foundation "[Schrag] delivers a story rich in irony, detail, and nuance, often told with passion and frequently challenging orthodoxies of both the political right and left. It is the right book at the right time."—Mark Paul, New America Foundation "History's lessons come through loud and clear as Peter Schrag vividly recounts the characters and the ideas behind that side of America that rejects immigration. Illuminating both in its sweep and its detail this 300-year narrative makes an important contribution to our understanding of today's policy debates."—Roberto Suro, author of *Strangers Among US: Latino Lives in a Changing America* "In an intemperate time, Peter Schrag's voice is lucid and truly American."—Richard Rodriguez

The Future We Choose

A concise survey of the culture and civilization of mankind, *The Lessons of History* is the result of a lifetime of research from Pulitzer Prize-winning historians Will and

Online Library Unfit For The Future The Need For Moral Enhancement Uehiro Series In Practical Ethics

Ariel Durant. With their accessible compendium of philosophy and social progress, the Durants take us on a journey through history, exploring the possibilities and limitations of humanity over time. Juxtaposing the great lives, ideas, and accomplishments with cycles of war and conquest, the Durants reveal the towering themes of history and give meaning to our own.

The Joy of Movement

In *Plowed Under*, Andrew P. Duffin traces the transformation of the Palouse region of Washington and Idaho from land thought unusable and unproductive to a wealth-generating agricultural paradise, weighing the consequences of what this progress has wrought. During the twentieth century, the Palouse became synonymous with wheat, and the landscape was irrevocably altered. At the dawn of the twenty-first century, native vegetation is almost nonexistent, stream water is so dirty that it is often unfit for even livestock, and 94 percent of all land has been converted to agriculture. Commercial agriculture also created a less noticeable ecological change: soil erosion. While common to industrial agriculture nationwide, topsoil loss evoked different political and social reactions in the Palouse. Farmers all over the nation take pride in their freedom and independence, but in the Palouse, Duffin shows, this mentality - a remnant of an older agrarian past - has been taken to the extreme and is partly responsible for erosion problems that are among the worst in the nation. In the hope of charting a better, more sustainable future, Duffin argues

Online Library Unfit For The Future The Need For Moral Enhancement Uehiro Series In Practical Ethics

for a candid look at the land, its people, their decisions, and the repercussions of those decisions. As he notes, the debate is not over whether to use the land, but over what that use will look like and its social and ecological results.

A Warning

A volume of all-new, character-driven stories expanding on the world of the hit video game Final Fantasy XV. This deluxe, hardcover edition includes full-color inserts featuring concept art and exclusive content. To oppose the gods or yield to fate? That is the question confronting each of the characters in The Dawn of the Future. Ardyn, having saved countless lives from the Starscourge, means to become the Founder King of Lucis and instead is cast into tragic exile. On the day the Empire falls, as the imperial capital collapses around them, Commodore Aranea is entrusted with the life of a singular young girl. The Oracle Lunafreya, upon awakening from the slumber of death, discovers that her body has undergone an extraordinary transformation. And after gazing upon the eternal, Noctis, the True King, finally comes to terms with his destiny. Herein lie the stories of the dawning of a new world in Final Fantasy XV.

Ageless Mirrorathlete

Online Library Unfit For The Future The Need For Moral Enhancement Uehiro Series In Practical Ethics

Despite believing he was bionic as a child, Ira Rainey was far from an elite athlete with superhuman running abilities like the ones he read about in books. He was in fact an overweight and unfit slacker who felt a bit sorry for himself because he had sore feet. Sure he ran a bit, but he also sat around a lot and ate and drank too much. Why? Because he could, and because he was a delusional optimist who thought everything would always be just fine. That was until a friend was diagnosed with terminal cancer and given months to live. It was an event that would push Ira to tackle his apathy towards life and take on the challenge of becoming an ultramarathon runner, pushing himself to go further than he had ever gone before. Award winning, *Fat Man to Green Man: From Unfit to Ultramarathon* is a warm and humorous account of one man's quest to uncover his true super powers as he journeys from fat to fit, and taking in everything that came between the two. It is a story of fields and friendships; mud and maps; but more importantly learning how to push yourself to achieve what you would never believe you could – and how to deal with the consequences. *Fat Man to Green Man* won the silver award for running books in The 2014 Running Awards, an award voted for by runners. Ira Rainey, with *Fat Man to Green Man*, was also a shortlisted finalist for New Writer of the Year in The British Sports Book Awards 2014. “Ira Rainey’s lifestyle transformation is an extraordinary example of what can be accomplished with passion and conviction. *Fat Man to Green Man* is an inspirational story of how the seemingly impossible can come true. A must-read for anyone looking to make a positive change.” - Dean Karnazes – World-renowned endurance athlete and NY

Times bestselling author “Rainey is proof that ultradistance races can be completed by middle-aged mortals and not just extreme endurance athletes with a penchant for pain.” - Men’s Fitness Magazine “The ending? It’s not what you will expect, but it will see you re-appraise everything in life you thought was certain. We think you will be inspired and, like us, are certain you may lose a few tears before you reach it.” - Running Fitness Magazine “It’s an inspirational tale of Ira’s battle with inner demons and ill health...I felt as if I was right beside him...” - Trail Running Magazine “So many things are covered here, the back to back training runs, the speed work (I was actually a bit intimidated by how fast he can knock out a 5K), the nutrition and weight loss and dealing with injury and recovery. He discovered that he was not bionic but overall he was very capable of running long distances and recalling the tales very vividly.”- James Adams - Ultramarathon runner and author of Running and Stuff “At times laugh out loud funny, at others quite poignant (the parts where Ira faces the impending loss of a dear friend are especially touching) this book is a fun take on one man’s journey to becoming an ultra runner, and finding himself in the process.” - UltrarunnerPodcast “Dean Karnazes taught us about what it takes to be at the very top of ultra running, wowing us in the process while Ira, inspired by Dean, gives us an insight of ultra running that the rest of us could aspire to.” - The Running Stories

The Lessons of History

Online Library Unfit For The Future The Need For Moral Enhancement Uehiro Series In Practical Ethics

Shows how science and public health shaped the meaning of race in the early twentieth century. Examining the experiences of Mexican, Japanese, and Chinese immigrants in Los Angeles, this book illustrates the ways health officials used complexly constructed concerns about public health to demean, diminish, discipline, and define racial groups.

A History of the Future

NEW YORK TIMES BESTSELLER "Reilly pokes more holes in Trump's claims than there are sand traps on all of his courses combined. It is by turns amusing and alarming." -- The New Yorker "Golf is the spine of this shocking, wildly humorous book, but humanity is its flesh and spirit." -- Chicago Sun-Times "Every one of Trump's most disgusting qualities surfaces in golf." -- The Ringer An outrageous indictment of Donald Trump's appalling behavior when it comes to golf -- on and off the green -- and what it reveals about his character. Donald Trump loves golf. He loves to play it, buy it, build it, and operate it. He owns 14 courses around the world and runs another five, all of which he insists are the best on the planet. He also claims he's a 3 handicap, almost never loses, and has won an astonishing 18 club championships. How much of all that is true? Almost none of it, acclaimed sportswriter Rick Reilly reveals in this unsparing look at Trump in the world of golf. Based on Reilly's own experiences with Trump as well as interviews with over 100 golf pros, amateurs, developers, and caddies, *Commander in Cheat* is a startling

Online Library Unfit For The Future The Need For Moral Enhancement Uehiro Series In Practical Ethics

and at times hilarious indictment of Trump and his golf game. You'll learn how Trump cheats (sometimes with the help of his caddies and Secret Service agents), lies about his scores (the "Trump Bump"), tells whoppers about the rank of his courses and their worth (declaring that every one of them is worth \$50 million), and tramples the etiquette of the game (driving on greens doesn't help). Trump doesn't brag so much, though, about the golf contractors he stiffes, the course neighbors he intimidates, or the way his golf decisions wind up infecting his political ones. For Trump, it's always about winning. To do it, he uses the tricks he picked up from the hustlers at the public course where he learned the game as a college kid, and then polished as one of the most bombastic businessmen of our time. As Reilly writes, "Golf is like bicycle shorts. It reveals a lot about a man." Commander in Cheat "paints a side-splitting portrait of a congenital cheater" (Esquire), revealing all kinds of unsightly truths Trump has been hiding.

Thrice to Thine

Woodson's classic work of criticism explores how the education received by blacks has failed to give them an appreciation of themselves as a race and their contributions to history. Woodson puts forward a program that calls for the educated to learn about their past and serve the black community.

Final Fantasy XV: the Dawn of the Future

In *The Evolution of Moral Progress*, Allen Buchanan and Russell Powell resurrect the project of explaining moral progress. They avoid the errors of earlier attempts by drawing on a wide range of disciplines including moral and political philosophy, evolutionary biology, evolutionary psychology, anthropology, history, and sociology. Their focus is on one especially important type of moral progress: gains in inclusivity. They develop a framework to explain progress in inclusivity to also illuminate moral regression--the return to exclusivist and "tribalistic" moral beliefs and attitudes. Buchanan and Powell argue those tribalistic moral responses are not hard-wired by evolution in human nature. Rather, human beings have an evolved "adaptively plastic" capacity for both inclusion and exclusion, depending on environmental conditions. Moral progress in the dimension of inclusivity is possible, but only to the extent that human beings can create environments conducive to extending moral standing to all human beings and even to some animals. Buchanan and Powell take biological evolution seriously, but with a critical eye, while simultaneously recognizing the crucial role of culture in creating environments in which moral progress can occur. The book avoids both biological and cultural determinism. Unlike earlier theories of moral progress, their theory provides a naturalistic account that is grounded in the best empirical work, and unlike earlier theories it does not present moral progress as inevitable or as occurring in definite stages; but rather it recognizes the highly contingent and

fragile character of moral improvement.

Killing by Remote Control

Living in a "perfect" world without social ills, a boy approaches the time when he will receive a life assignment from the Elders, but his selection leads him to a mysterious man known as the Giver, who reveals the dark secrets behind the utopian facade.

Fit for Growth

From the New York Times bestselling author of *I Dissent* comes a biographical graphic novel about celebrated Supreme Court justice Ruth Bader Ginsburg. Supreme Court justice Ruth Bader Ginsburg is a modern feminist icon—a leader in the fight for equal treatment of girls and women in society and the workplace. She blazed trails to the peaks of the male-centric worlds of education and law, where women had rarely risen before. Ruth Bader Ginsburg has often said that true and lasting change in society and law is accomplished slowly, one step at a time. This is how she has evolved, too. Step by step, the shy little girl became a child who questioned unfairness, who became a student who persisted despite obstacles, who became an advocate who resisted injustice, who became a judge who revered

Online Library Unfit For The Future The Need For Moral Enhancement Uehiro Series In Practical Ethics

the rule of law, who became...RBG.

Unfit for Democracy

In late Victorian America few issues held the public's attention more closely than the allegedly unnatural family life of the urban poor. In *Tramps, Unfit Mothers, and Neglected Children*, Sherri Broder brings new insight to the powerful depictions of the urban poor that circulated in newspapers and novels, public debate and private correspondence, including the irresponsible tramp, the "fallen" single mother, and the neglected child. Broder considers how these representations contributed to debates over the nature of family life and focuses on the ways different historical actors—social reformers, labor activists, and ordinary laboring people—made use of the available cultural narratives about family, gender, and sexuality to comprehend changes in turn-of-the-century America. In the decades after the Civil War, Philadelphia was an important center of charity, child protection, and labor reform. Drawing on the rich records of the Pennsylvania Society to Protect Children from Cruelty, Broder assesses the intentions and consequences of reform efforts devoted to women and children at the turn of the century. Her research provides an eloquent study of how the terms used by social workers and their clients to discuss the condition of poverty continue to have a profound influence on social policies and develops a complex historical perspective on how social policy and representations of poor families have been and remain mutually influential.

The Giver

Stress, obesity, poor mental health, drug addiction, bowel diseases, violence and fake news; a stark checklist of modern world problems and every one of them is an echo of our evolutionary past. In *Unfit for Purpose*, biologist and broadcaster Adam Hart explores the mismatch between our fundamental biology and the modern world we have created. In each chapter Adam reveals the many ways in which biological adaptations that evolved to help us survive and thrive now work against us. For example, in the modern world stress is a killer but how did 'fight or flight' instincts turn from life-savers to life-takers? Obesity might be a disease now but is it really just a troublesome side-effect of our complex evolutionary past? Whether it's the derailing of microbes in our gut, the rise of gluten and lactose intolerance, the problems of social media or the horrors of drug addiction we always seem to have one foot in the modern world and the other firmly in our evolutionary past. By probing deep into our evolutionary legacy, exploring the science, archaeology, medicine, genetics, sociology and more, to show how, in a modern world of our own making, we find ourselves 'unfit for purpose'. But all is not lost! By unpicking the evolutionary causes of many of our current woes, it reveals some secrets of evolutionarily-informed treatments that will change the way we think about ourselves and our future.

How to Get Rid of a President

#1 New York Times Bestseller #1 Washington Post Bestseller #1 Wall Street Journal Bestseller On March 16, 2018, just twenty-six hours before his scheduled retirement from the organization he had served with distinction for more than two decades, Andrew G. McCabe was fired from his position as deputy director of the FBI. President Donald Trump celebrated on Twitter: "Andrew McCabe FIRED, a great day for the hard working men and women of the FBI - A great day for Democracy." In *The Threat: How the FBI Protects America in the Age of Terror and Trump*, Andrew G. McCabe offers a dramatic and candid account of his career, and an impassioned defense of the FBI's agents, and of the institution's integrity and independence in protecting America and upholding our Constitution. McCabe started as a street agent in the FBI's New York field office, serving under director Louis Freeh. He became an expert in two kinds of investigations that are critical to American national security: Russian organized crime—which is inextricably linked to the Russian state—and terrorism. Under Director Robert Mueller, McCabe led the investigations of major attacks on American soil, including the Boston Marathon bombing, a plot to bomb the New York subways, and several narrowly averted bombings of aircraft. And under James Comey, McCabe was deeply involved in the controversial investigations of the Benghazi attack, the Clinton Foundation's activities, and Hillary Clinton's use of a private email server when she was secretary of state. *The Threat* recounts in compelling detail the time between

Online Library Unfit For The Future The Need For Moral Enhancement Uehiro Series In Practical Ethics

Donald Trump's November 2016 election and McCabe's firing, set against a page-turning narrative spanning two decades when the FBI's mission shifted to a new goal: preventing terrorist attacks on Americans. But as McCabe shows, right now the greatest threat to the United States comes from within, as President Trump and his administration ignore the law, attack democratic institutions, degrade human rights, and undermine the U.S. Constitution that protects every citizen. Important, revealing, and powerfully argued, *The Threat* tells the true story of what the FBI is, how it works, and why it will endure as an institution of integrity that protects America.

Unfit to Be a Slave

In this wide-ranging survey, Peter J. Bowler explores the phenomenon of futurology: predictions about the future development and impact of science and technology on society and culture in the twentieth century. Utilising science fiction, popular science literature and the novels of the literary elite, Bowler highlights contested responses to the potential for revolutionary social change brought about by real and imagined scientific innovations. Charting the effect of social and military developments on attitudes towards innovation in Europe and America, Bowler shows how conflict between the enthusiasm of technocrats and the pessimism of their critics was presented to the public in books, magazines and exhibitions, and on the radio and television. A series of case studies reveals the

Online Library Unfit For The Future The Need For Moral Enhancement Uehiro Series In Practical Ethics

impact of technologies such as radio, aviation, space exploration and genetics, exploring rivalries between innovators and the often unexpected outcome of their efforts to produce mechanisms and machines that could change the world.

Commander in Cheat

This book makes recommendations for meeting four major challenges currently facing the United States, including globalization, the information technology revolution, chronic deficits, and unbalanced energy consumption. America has a huge problem. It faces four major challenges, on which its future depends, and it is failing to meet them. In this book the authors analyze those challenges, globalization, the revolution in information technology, the nation's chronic deficits, and its pattern of energy consumption, and spell out what needs to be done now to rediscover America's power and prowess. They explain how the end of the cold war blinded the nation to the need to address these issues seriously. They show how America's history, when properly understood, provides the key to coping successfully and explain how the paralysis of the U.S. political system and the erosion of key American values have made it impossible to carry out the policies the country needs. This work is both a searching exploration of the American condition today and a rousing manifesto for American renewal.

Fat Man to Green Man

It's the moment every attorney fears most one careless moment that threatens careers, reputations, lives. For Nina Reilly, it will change everything—and ignite a case where her own clients are witnesses against her and where the defendant is Nina herself. As an attorney championing desperate people, Nina Reilly has skirted the edges of legal ethics in pursuit of a just result, but she has never before broken the rule of absolute protection of her clients' secrets. One September night in Lake Tahoe when her unlocked truck is stolen, her life changes forever. Gone are her most sensitive case files, complete with the sometimes brutally candid notes she took while interviewing her clients. It's every attorney's nightmare. And now the worst has happened: The secrets are being revealed, one by one, in ways that will cause the greatest harm. Nina's own clients complain to the State Bar of California, and suddenly Nina is fighting for her license and her livelihood in a legal proceeding that may ultimately lead her to disbarment. In desperation, Nina turns to her ex-husband, celebrated San Francisco lawyer Jack McIntyre, to represent her. And as personal tensions erupt between McIntyre and Nina's sometime boyfriend, private investigator Paul van Wagoner's reputations are ruined and people begin to die a chilling pattern of rage and revenge comes into focus. Someone is bent on destroying the lives of Nina's clients and, in the process, Nina Reilly. From the Hardcover edition.
