Pagan Prayer Beads

This new edition of a classic book on the impact on Americans of the Vietnam War reintroduces the voices of the Vietnam era to a new generation of readers. In a new introduction written especially for this edition. Myra MacPherson reports on the legacy of the war and its impact on contemporary political life, interviews a number of her principal characters to bring their stories up to date, and reflects on what has changed, and what hasn't, for the haunted generation in the years since these interviews were conducted. Book jacket.

Nail the Job Interview!

Described as "Who owns whom, the family tree of every major corporation in America, " the directory is indexed by name (parent and subsidiary), geographic location, Standard Industrial Classification (SIC) Code, and corporate responsibility.

Ballyturk

Desperate to compete with the newly opened Walt Disney World Resort, Miss Thelma Foote struggles to deal with the lack of business at Weeki Wachee Springs, while coping with the constant repairs, bills, and mischievous "mermaids," but everyone's luck takes a turn for the better when Delores Walker arrives from the Bronx to pursue her long-time dream of becoming a mermaid.

Basis of Assets

Provides the first comprehensive post-Heller account of the Second Amendment as constitutional law - dispelling many myths along the way.

A fully updated and revised edition of THE 30-DAY HEART TUNE-UP, featuring a step-by-step program to optimize your cardiovascular health, boost your energy, slim your waistline, and heat up your sex life -- plus 60 delicious recipes

Cardiovascular disease is America's #1 killer, and while most doctors focus on lowering cholesterol and blood pressure they are overlooking the real culprits: arterial plaque and poor gut health. The good news is that everyone -- regardless of size, genetics, gender, or age -- can treat arterial plaque, improve their overall health, and prevent heart attacks and strokes with THE 30-DAY HEART TUNE-UP. Inside, you'll discover

- A delicious, heart-healthy diet designed to supercharge your heart health
- Exercises to improve circulation and strengthen your entire cardiovascular system
- Creative and effective techniques for stress management
- A customized supplement plan
- Cutting-edge science on the fascinating ways the bacteria in your gut can affect the health of your heart.

This fully revised and updated edition of THE 30-DAY HEART TUNE UP includes the latest science on the surprising connections between your gut and your heart as well as tons of new information on reducing cardiovascular risk factors like obesity, high blood sugar, high cholesterol, and chronic inflammation through diet and exercise, it will help you get healthy -- and stay healthy -- for life.

The Dublin Scuffle

Today, the word is nearly ubiquitous: seeming to have come out of nowhere to dominate the discussion, from permaculture to renewable energy to the local food movement, the ideas that underlie and define sustainability can be traced back several centuries. In this illuminating and entertaining history, Jeremy L. Caradonna traces its origins to the emergence of planned yield forestry in the late 17th and 18th centuries, through the challenges of the Industrial Revolution in the 19th, the birth of the environmental movement in the 20th, and finally the emergence of a concrete effort to create a society that is stable, prosperous, ecologically minded, and forward looking. While sustainability draws upon ideas of social justice, ecological economics, and environmental conservation, it is more than the sum of its parts. Caradonna's book broadens our understanding of what the term means, showing how it progressed from a relatively marginal concept to an ideal that dominates lifestyle choices, government and corporate strategies, and even national and international policy.--From publisher description.

The Entrepreneurial Society

The Jailhouse Letters

A comprehensive reference guide to important medicinal plants that are native to Canada. Categories of information include: scientific, English and French names; description and classification; medicinal and non-medicinal uses; toxicity; chemistry; importance; ecology; agricultural and commercial aspects; human interest information; selected key literature; and worldwide Web links. All species are illustrated and distribution maps are included. Introductory chapters address such topics as: the business of growing medicinal plants; the regulatory and legal framework in Canada for producing and marketing medicinal plants; and hazards

associated with medicinal plants. Also provided is a glossary of medicinal and pharmacological terms.

Gala-days

An ambitious, profound and tender work from one of Ireland's leading playwrights.

Canadian Medicinal Crops

The Last Colonel of the Irish Brigade

Previous generations enjoyed the security of lifelong employment with a sole employer. Public policy and social institutions reinforced that security by producing a labor force content with mechanized repetition in manufacturing plants, and creating loyalty to one employer for life. This is no longer the case. Globalization and new technologies have triggered a shift away from capital and towards knowledge. In today's global economy, where jobs and factories can be moved quickly to low-cost locations, the competitive advantage has shifted to ideas, insights, and innovation. But it is not enough just to have new ideas. It takes entrepreneurs to actualize them by championing them to society. Entrepreneurship has emerged as the proactive response to globalization. In this book, award-winning economist David B. Audretsch identifies the positive, proactive response to globalization--the entrepreneurial society, where change is the cutting edge and routine work is inevitably outsourced. Under the managed economy of the cold war era, government policies around the world supported big business, while small business was deemed irrelevant and largely ignored. The author documents the fundamental policy revolution underway, shifting the focus to technology and knowledge-based entrepreneurship, where start-ups and small business have emerged as the driving force of innovation, jobs, competitiveness and growth. The role of the university has accordingly shifted from tangential to a highly valued seedbed for coveted new ideas with the potential to create not just breathtaking new ventures but also entire new industries. By understanding the shift from the managed economy and the emergence of the entrepreneurial society, individuals, businesses, and communities can learn how to proactively harness the opportunities afforded by globalization in this new entrepreneurial society.

You Are a F*cking Awesome Mom

How were holidays chosen and taught in biblical Israel, and what did they have to do with the creation narrative? Michael LeFebvre considers the calendars of the Pentateuch, arguing that dates were added to Old Testament narratives not as journalistic details but to teach sacred rhythms of labor and worship. LeFebvre then applies this insight to the creation week, finding that the days of creation also serve a liturgical purpose.

The Book of Psalms for Worship

The food and beverage industries today face an intensely competitive business

environment. To the degree that the product developer and marketer – as well as general business manager – can more fully understand the consumer and target development and marketing efforts, their business will be more successful. Sensory and Consumer Research in Food Product Design and Development is the first book to present, from the business viewpoint, the critical issues faced by sensory analysts, product developers, and market researchers in the food and beverage arena. The book's unique perspective stems from the author team of Moskowitz, Beckley, and Resurreccion, three leading practitioners in the field, who each combines an academic and business acumen. The beginning reader will be introduced to systematic experimentation at the very early stages, to newly emerging methods for data acquisition/knowledge development, and to points of view employed by successful food and beverage companies. The advanced reader will find new ideas, backed up by illustrative case histories, to provide yet another perspective on commonly encountered problems and their practical solutions. Aimed toward all aspects of the food and beverage industry, Sensory and Consumer Research in Food Product Design and Development is especially important for those professionals involved in the early stages of product development, where business opportunity is often the greatest.

The Value Line Investment Survey

Religions from around the world--Buddhism, Hinduism, Catholicism, Islam, and many more, including the Pagan earth religions--use prayer beads as useful guides to remembering prayers and principles. Pagan Prayer Beads by John Michael Greer and Clare Vaughn is a unique and practical introduction to the design, creation, and use of Pagan rosaries, teaching the reader to design and make personal prayer beads for use in myriad spiritual practices. Co-written by a beading expert (Clare Vaughn) and one of the leading lights in modern Paganism (John Michael Greer), this book will garner an eager audience--from beginners to elders--looking for new inspiration in their personal spiritual practice. Beautifully written, instructive, and straightforward, Pagan Prayer Beads is user-friendly and easy to understand. Lovely black-and-white photographs accompany the text to further illustrate the art and craft of Pagan prayer beads. The how-to sections were "tested" by novices to both crafting and "the craft," who found the directions clear and easy to follow. Throughout the book, Greer and Vaughn have included fascinating history and lore as well as crystal properties, Pagan symbology, and deeply meaningful prayers and rituals to use with the rosaries. * 30 lovely black-and-white photos accompany the beading instructions.

Exploring Professional Cooking

The Liturgy of Creation

We humans have long enjoyed the satisfying experience of cooking and eating meat. We all seem to have memories of our favorite meat-eating experiences. What makes these meat dishes better? Is it the way they are cooked? Is it a better cut of meat that makes them better? How can we recreate the dishes? I spent close to forty years in the retail meat business. My biggest joy during these years was sharing my accumulated knowledge with customers, helping them to choose the right product at the right price. I have written *The Butcher's Guide* to share this same knowledge with a larger audience. Today's strong interest in enjoying cooking, along with the economic benefits of saving money, tells me the time is right for such a book. Changes in the retail meat industry are also reasons to supply today's consumers with better information. As the meat production process is streamlined, skilled butchers are being replaced by less expensive, unskilled workers. The butcher behind the meat case is no longer a source of information. My love of cooking was inspired by my mother. Unlike most families, which eat the same dozen meals over and over again, my mother was always making something new and different. I share her passion for cooking. I like to stretch my cooking talents to make a variety of dishes. *The Butcher's Guide* has information for a large audience, from "foodies" to families looking to save money on their meat purchases.

The Selfless Constitution

A much-needed voice of encouragement for every woman who had a baby and lost her mind Sometimes, motherhood feels never-ending. A child is born, chaos ensues, and it seems like life will never return to normal. In *You Are a F*cking Awesome Mom*, award-winning journalist and Instagram star Leslie Anne Bruce acknowledges that, yes, motherhood is a total mind f*ck-but then she offers the self-empowerment lessons new mothers need to get through the psychic upheaval and emerge stronger than ever. After childbirth, a woman's body, her relationships, and her very sense of self are tested like never before. Bruce encourages readers to look past the sugarcoated truisms about the miracles of child-rearing in order to embrace the real joys of motherhood, spit-up stains and all. Loaded with unfettered support from a mom who has been through it all, *You Are a F*cking Awesome Mom* offers a lifeline of encouragement, inspiration, and community for the new mama who got a baby, lost her mind, and desperately wants to find herself again.

Care of the Dying

Central Intelligence Machinery

In this thrilling second book of the Earthborn trilogy, Lucas and Asha have survived the decimation of Earth at the hands of the invading Xalans and seek safe haven with their enemy's true foes, the Sorans. They find a lush planet inhabited by a civilization far more advanced than their own, waging a seemingly endless war against a constantly evolving enemy. The Sorans call the pair of them the

“Earthborn” and they’re welcomed as heroes, almost as gods. To an audience of billions, they swear an oath to avenge their fallen planet by aiding the Sorans in their war against Xala. But soon Lucas and Asha find Sora just as dangerous as apocalyptic Earth when they’re targeted by the Fourth Order, a rebel collective who decries them as false prophets and harbingers of further bloodshed. Their friend and turncoat Xalan scientist Alpha believes he’s located someone who can help them turn the tide of the war for good, stranded on a conquered colony planet. But landing on the new world, Lucas and Asha find themselves hunted by a violent, mysterious beast, known only as the Desecrator, let loose by the Xalans. Escaping Earth was only the beginning. As Lucas and Asha quickly learn, the universe has worlds and creatures far more dangerous than anything their home planet could have offered, and their continued survival hinges on gaining new allies they never could have imagined. Skyhorse Publishing, under our Night Shade and Talos imprints, is proud to publish a broad range of titles for readers interested in science fiction (space opera, time travel, hard SF, alien invasion, near-future dystopia), fantasy (grimdark, sword and sorcery, contemporary urban fantasy, steampunk, alternative history), and horror (zombies, vampires, and the occult and supernatural), and much more. While not every title we publish becomes a New York Times bestseller, a national bestseller, or a Hugo or Nebula award-winner, we are committed to publishing quality books from a diverse group of authors.

Good Trouble

The way the vast majority of us think about the self, consciousness and free will is incorrect dramatically out of step with what the majority of neuroscientists, cognitive psychologists scientists and analytic philosophers have to say about those subjects. One consequence of these erroneous views is that the manner in which the majority of us understand freedom as a metaphysical term and as a political concept -- is sharply at odds with how things actually are. We replicate similar kinds of errors when we think about how various forms of human association are constructed and how change actually occurs within such associations. Once again, epistemological fallacies with regard to social theory have the consequence of leading us to attribute far greater freedom to groups than they actually possess. This second misattribution of autonomy results in institutional political arrangements and constitutional doctrines at odds with what we know about the human condition. As things stand, the various models of political theory with which the South African Constitutional Court operates rest upon a belief that the rights and freedoms enshrined in the Final Constitution should enable individuals to exercise relatively unfettered control over decisions about the intimate relationships and the various practices deemed critical to their self-understanding. However, individual autonomy as a foundation for constitutional theory overemphasizes dramatically the actual space for self-defining choices. In truth, our experience of personhood, of self-consciousness, is a function of a complex set of narratives over which we exercise little in the way of (self) control. The involuntary and arational nature of identity formation at the level of both the individual and the social -- requires a constitutional theory that supplants the model of a rational individual moral agent which undergirds much of our current jurisprudence with a vision of the self that is more appropriately located within and determined by the associations to which we all belong. Despite the involuntary and arational nature of identity formation, we can live within

communities that determine the greater part of the meaning we make, and still remain committed to the possibility of significant change (for the better) within those communities. This thesis then goes on to explain how a commitment to experimentalism in the political domain, when married to a robust conception of basic entitlements and citizenship, services human flourishing. (To expand the conditions for flourishing, however, is not to make us metaphysically free to will our actions: a commitment to flourishing reflects an attempt to create an environment in which all inhabitants of South Africa have the opportunity to live lives worth valuing.) Experimental constitutionalism dovetails with a very modest, naturalized account of flourishing because both accounts (1) take the radical givenness of existing constitutive attachments seriously: (2) recognize the boundedness of individual and collective rationality: and (3) describe various kinds of feedback mechanisms that allow for error correction and the enhancement of the conditions of being. Experimental constitutionalism, in particular, enables more citizens to see what works' and what doesn't both with respect to the means and the ends of our existence. Experimental constitutionalism offers the promise of improving the conditions for being by suggesting a range of alterations in constitutional doctrine and a host of changes in the manner in which many political institutions operate. In South Africa, the innovations associated with experimental constitutional design embrace: (1) a doctrine of constitutional supremacy that maintains a meaningful equilibrium with a doctrine of separation of powers, and thus sets relatively clear guidelines for how authority for constitutional interpretation might best be shared by the judiciary, the legislature, the executive and non-state-actors: (2) the use of various standard judicial mechanisms such as cost orders, court procedures, amici and intervenors, expanded constitutional jurisdiction and structural injunctions to create bubbles of participatory democracy better able (than courts or legislatures) to resolve various kinds of polycentric conflict: (3) an approach to limitations analysis that provides a better process than balancing for experimentalist adjudication: and (4) greater roles for Chapter 9 Institutions with respect to investigation, information-sharing and norm-setting: and (5) a principle of democracy that invites public participation in law-making that will both elicit better information about which government policies work best and effect widespread reflection about the meaning of those constitutional norms that govern our lives. The thesis then (a) mines the brief historical record of two important policy areas Housing and Education to show how the principles of experimental constitutionalism have already been put to work and (b) re-examines six Constitutional Court cases to demonstrate how the dual commitment to experimental constitutionalism and flourishing might generate more optimal outcomes.

The Butcher's Guide

This paper examines the financial stability implications arising from securitization markets, with one eye on the past and another on the future. The paper begins by deriving a number of "lessons learned" based on an examination of key industry developments in the years before the crisis. Emphasis is placed on the various ways in which securitization markets dramatically changed shape in the years preceding the crisis, vis-à-vis their earlier (simpler) incarnation. Current impediments to securitization markets are then discussed, including a treatment of various regulatory initiatives, the operational infrastructure of securitization

markets, and related official sector intervention. Finally, a broad suite of policy recommendations is presented to address the factors that either contributed to the crisis or may currently be posing obstacles to growth-supportive, sustainable securitization markets. These proposals are guided by the objective of preserving the beneficial features of securitization, while mitigating those that pose a potential risk to financial stability.

A Government that Worked Better and Cost Less?

Her son is in prison, he has lost his way, his mother makes a desperate attempt to reach him, to save him from himself.

LexisNexis Corporate Affiliations

In 1996, everything about Joe Biel's life seemed like a mistake. He was 18, he lived in Cleveland, he got drunk every day, and he had mystery health problems and weird social tics. All his friends' lives were as bad or worse. To escape a nihilistic, apocalyptic worldview and to bring reading and documentation into a communal punk scene, he started assembling zines and bringing them in milk crates to underground punk shows. Eventually this became Microcosm Publishing. But Biel's head for math was stronger than his ability to relate to people, and it wasn't until he was diagnosed with Asperger's Syndrome that it all began to fall into place. This is the story of how, over 20 years, one person turned a litany of continuing mistakes and seeming wrong turns into a happy, fulfilled life and a thriving publishing business that defies all odds.

Sensory and Consumer Research in Food Product Design and Development

Evaluates UK government modernization programs from 1980 to the present. Provides a framework for assessing long-term performance in government, bringing together the 'working better' and 'costing less' dimensions.

The Positive Second Amendment

ONE OF AMAZON'S BEST BUSINESS BOOKS OF 2018 ONE OF THE FINANCIAL TIMES BUSINESS BOOKS OF THE MONTH ON RELEASE ONE OF BUSINESS INSIDER'S BEST BUSINESS BOOKS TO READ THIS SUMMER A guide to the early morning habits that boost your productivity and relax you—featuring interviews with leaders like Arianna Huffington, General Stanley McChrystal, Marie Kondo, and more. Marie Kondo performs a quick tidying ritual to quiet her mind before leaving the house. The president of Pixar and Walt Disney Animation Studios, Ed Catmull, mixes three shots of espresso with three scoops of cocoa powder and two sweeteners. Fitness expert Jillian Michaels doesn't set an alarm, because her five-year-old jolts her from sleep by jumping into bed for a cuddle every morning. Part instruction manual, part someone else's diary, the authors of *My Morning Routine* interviewed sixty-four of today's most successful people, including three-time Olympic gold medalist Rebecca Soni, Twitter cofounder Biz Stone, and General Stanley McChrystal—and offer timeless advice on creating a routine of your own. Some routines are all

about early morning exercise and spartan living; others are more leisurely and self-indulgent. What they have in common is they don't feel like a chore. Once you land on the right routine, you'll look forward to waking up. This comprehensive guide will show you how to get into a routine that works for you so that you can develop the habits that move you forward. Just as a Jenga stack is only as sturdy as its foundational blocks, the choices we make throughout our day depend on the intentions we set in the morning. Like it or not, our morning habits form the stack that our whole day is built on. Whether you want to boost your productivity, implement a workout or meditation routine, or just learn to roll with the punches in the morning, this book has you covered.
