Philippe de Vosjoli has written a concise and useful guide, well illustrated with color photographs, that offers all of the information a boa keeper needs to maintain a pet snake safely and in the best of health. This Advanced Vivarium Systems title includes information about selecting and purchasing a healthy boa constrictor, proper housing and maintenance needs, feeding, and safe handling. Dr. Roger Klingenberg, a herp veterinary specialist, has written a special health chapter on diseases and disorders, with particular emphasis on the dreaded boa AIDS (inclusion body disease or IBD) as well as parasitism, respiratory disease, and more. The chapter concludes with a six-page chart on troubleshooting health concerns, which all boa constrictor keepers will find useful for general upkeep and recognizing and dealing with serious issues. Beyond the husbandry and health of boa constrictors, this book offers an excellent chapter by Jeff Ronne on breeding Colombia boa constrictors, beginning with the size and health of breeding animals and the female's cycling to the birth and care of newborns. Resources and index included.

In the summer of 1803, Thomas Jefferson sent Meriwether Lewis and William Clark on a journey to establish an American presence in a land of unqualified natural resources and riches. Is it fitting that, on the 200th anniversary of that expedition, the United States, together with international partners, should embark on another journey of exploration in a vastly more extensive region of remarkable potential for discovery. Although the oceans cover more than 70 percent of our planet's

surface, much of the ocean has been investigated in only a cursory sense, and many areas have not been investigated at all. Exploration of the Seas assesses the feasibility and potential value of implementing a major, coordinated, international program of ocean exploration and discovery. The study committee surveys national and international ocean programs and strategies for cooperation between governments, institutions, and ocean scientists and explorers, identifying strengths, weaknesses, and gaps in these activities. Based primarily on existing documents, the committee summarizes priority areas for ocean research and exploration and examines existing plans for advancing ocean exploration and knowledge.

THE INSTANT NEW YORK TIMES BESTSELLER "Sims's vivid portrait of Trump shrewdly balances admiration with misgivings, and his intricate, engrossing accounts of White House vendettas and power plays have a good mix of immersion and perspective. The result is one of the best of the recent flood of Trump tell-alls." —Publishers Weekly The first honest insider's account of the Trump administration. If you hate Trump you need the truth; if you love Trump you need the truth. After standing at Donald Trump's side on Election Night, Cliff Sims joined him in the West Wing as Special Assistant to the President and Director of White House Message Strategy. He soon found himself pulled into the President's inner circle as a confidante, an errand boy, an advisor, a punching bag, and a friend. Sometimes all in the same conversation. As a result, Sims gained unprecedented access to the

President, sitting in on private meetings with key Congressional officials, world leaders, and top White House advisors. He saw how Trump handled the challenges of the office, and he learned from Trump himself how he saw the world. For five hundred days, Sims also witnessed first-hand the infighting and leaking, the anger, joy, and recriminations. He had a role in some of the President's biggest successes, and he shared the blame for some of his administration's worst disasters. He gained key, often surprising insights into the players of the Trump West Wing, from Jared Kushner and John Kelly to Steve Bannon and Kellyanne Conway. He even helped Trump craft his enemies list, knowing who was loyal and who was not. And he took notes. Hundreds of pages of notes. In real-time. Sims stood with the President in the eye of the storm raging around him, and now he tells the story that no one else has written—because no one else could. The story of what it was really like in the West Wing as a member of the President's team. The story of power and palace intrigue, backstabbing and bold victories, as well as painful moral compromises, occasionally with yourself. Team of Vipers tells the full story, as only a true insider could.

Hannah's list: Ghosts are cold to the touch. Being tied up isn't much fun. And danger is a sure-fire prescription for amazing sex! When Hannah Campbell attends a memorial service for the neurosurgeon who once saved her life, the last thing she expects is a lightning strike that knocks her out cold and blasts her lungs full of the departed's ashes. Things only get weirder when she wakes up to find the deceased standing over her hospital bed, insisting she help him track down the terrorists who blew up his plane. Professor Takeshi Shimodo doesn't know what to believe when smart-mouthed Hannah appears on his doorstep, claiming to be haunted by the ghost of his best friend. Yet she exhibits some extraordinary psychic abilities. And her determination to find justice for the crash victims, in spite of her fragile health, touches his heart. Takeshi's acupressure techniques are meant to calm Hannah's erratic heartbeat, but the longer they are together, the more his magic fingers have the opposite effect. Soon, their passion flares hotter than any lightning strike. But now the terrorist they seek is hunting them. And the FBI is suspicious Hannah knows just a little too much. Without some "spiritual" help, they haven't a ghost of a chance. Warning, this title contains the following: explicit sex, graphic language and violence.

This book is designed to engage students' interest and promote their writing abilities while teaching them to think critically and creatively. Dowden takes an activist stance on critical thinking, asking students to create and revise arguments rather than simply recognizing and criticizing them. His book emphasizes inductive reasoning and the analysis of individual claims in the beginning, leaving deductive arguments for consideration later in the course.

In this encyclopedic book, Lewis provides insights into the origins, training, tactics, weapons and achievements of special forces and special mission units throughout the world, focusing particularly on US and UK forces. He also looks at the codes that bind the members of these elite units together. He reveals training secrets in everything from wilderness survival to hand-to-hand combat. In doing so, he draws extensively on biographies, autobiographies, training manuals, interviews and press coverage of key operations. The elite forces covered include: The British Army's Special Air Service (SAS), established in 1950, which has served as a model for the special forces of many countries. Its counter-terrorist wing famously took part in the hostage rescue during the siege of the Iranian Embassy in London in 1980. The Parachute Regiment, the airborne infantry element of 16 Air Assault Brigade, which spearheads the British Army's rapid intervention capability. It is closely linked to United Kingdom Special Forces. The US Navy's SEALs (Sea, Air, Land Teams), trained to conduct special operations in any environment, but uniquely specialised and equipped to operate from and in the sea. Together with speedboat-operating Naval Special Warfare Combatant-Craft Crewmen, they form the operational arm of the Naval Special Warfare community, the Navy component of the US Special Operations Command. Their special operations include: neutralizing enemy forces; reconnaissance; counter-terrorism

(famously in the killing of Osama bin Laden); and training allies. The US Army's Delta Force: The Special Mission Unit, 1st Special Forces Operational Detachment-Delta (1st SFOD-D), known simply as Delta Force, the Army component of Joint Special Operations Command. Its role is counter-terrorism, direct action and national intervention operations, though it has the capability to conduct many different kinds of clandestine missions, including hostage rescues and raids. The US Army Rangers, a light infantry combat formation under the US Army Special Operation Command. The Green Berets - motto: 'to free the oppressed' - trained in languages, culture, diplomacy, psychological warfare and disinformation. Russia's Spetsnaz, whose crack anti-terrorist commandos ended the Moscow theatre siege, and who have a reputation for being among the world's toughest and most ruthless soldiers. Spetsnaz units saw extensive action in Afghanistan and Chechnya, often operating far behind enemy lines. Israeli Special Forces, especially Shayetet 13 (Flotilla 13), whose motto, in common with the rest of the Israeli military, is 'Never again', a reference to the Holocaust. They are particularly adept at the specifically Israeli martial art Krav Maga, which they dub 'Jew-jitsu'.
