Trailer Life's RV Repair & Maintenance Manual

This book offers a very direct and readable analysis of the main challenges facing our societies today, such

as reducing inequality, protecting the planet, and in particular mobilizing our financial resources which linger in tax havens and feed speculation, instead of funding the sustainable development we need. It precisely considers the most important factors, including corporate governance, financialization, capturing political power, and the limits to adequate national economic policies in a world dominated by global finance. The book's presentation of how sensible and productive policies are dismantled will be highly interesting for the international community, whether in the academic, corporate or government spheres.

process, they leave billions of dollars on the negotiation table. Global Negotiation provides critical tools to help businesspeople save money (and face) when negotiating across cultural divides. Drawing on their more than 50 combined years of experience, as well as extensive field research with over 2000 business people in 21 different cultures, John L. Graham and William Hernández Requejo have discovered how to create long-lasting commercial relationships around the world. The authors provide a rare combination of practical insight and illuminating anecdotes, and offer examples from well-known companies such as Toyota, Ford, Intel, AT&T, Rockwell, Boeing, and Wal-Mart.

In *The Ritual Process: Structure and Anti-Structure*, Victor Turner examines rituals of the Ndembu in Zambia and develops his now-famous concept of "Communitas." He characterizes it as an absolute inter-human relation beyond any form of structure. *The Ritual Process* has acquired the status of a small classic since these lectures were first published in 1969. Turner demonstrates how the analysis of ritual behavior and symbolism may be used as a key to understanding social structure and processes. He extends Van Gennep's notion of the "liminal phase" of rites of passage to a more general level, and applies it to gain understanding of a wide range of social

phenomena. Once thought to be the "vestigial" organs of social conservatism, rituals are now seen as arenas in which social change may emerge and be absorbed into social practice. As Roger Abrahams writes in his foreword to the revised edition: "Turner argued from specific field data. His special eloquence resided in his ability to lay open a sub-Saharan African system of belief and practice in terms that took the reader beyond the exotic features of the group among whom he carried out his fieldwork, translating his experience into the terms of contemporary Western perceptions. Reflecting Turner's range of intellectual interests, the book emerged as exceptional and eccentric in many ways: yet it achieved its place within the intellectual world because it so successfully synthesized continental theory with the practices of ethnographic reports."

Engines of Change

A narrative like no other: a cultural history that explores how cars have both propelled and reflected

the American experience— from the Model T to the Prius. From the assembly lines of Henry Ford to the open roads of Route 66, from the lore of Jack Kerouac to the sex appeal of the Hot Rod, America's history is a vehicular history—an idea brought brilliantly to life in this major work by Pulitzer Prize-winning journalist Paul Ingrassia. Ingrassia offers a wondrous epic in fifteen automobiles, including the Corvette, the Beetle, and the Chevy Corvair, as well as the personalities and tales behind them: Robert McNamara's unlikely role in Lee Iacocca's Mustang, John Z. DeLorean's Pontiac GTO , Henry Ford's Model T, as well as Honda's Accord, the BMW 3 Series, and the Jeep, among others. Through these cars and these characters, Ingrassia shows how the car has expressed the particularly American tension between the lure of freedom and the obligations of utility. He also takes us through the rise of American manufacturing, the suburbanization of the country, the birth of the hippie and the yuppie, the emancipation of women, and many more fateful episodes and eras, including the car's unintended consequences: trial lawyers, energy crises, and urban sprawl. Narrative history of the highest caliber, Engines of Change is an entirely edifying new way to look at the American story.

Sable Keech is a walking dead man, and the only one to have been resurrected by nanochanger. Did he succeed because he was infected by the Spatterjay virus, or because he came late to resurrection in a tank of seawater? Tracing the man's last-known seaborne journey, Taylor Bloc wants to know the truth. He also wants so much else - adulation, power, control - and will go to any lengths to achieve them. An ancient hive mind, almost incomprehensible to the human race, has sent an agent to this uncertain world. Does it simply want to obtain the poison 'sprine' that is crucial to immortality - and, if so, maybe Janer must find it and stop it. Meanwhile, still faced with the ennui of immortality, Erlin has her solitude rudely interrupted by a very angry whelkus titanicus, and begins the strangest of journeys. Deep in the ocean the Spatterjay virus has wrought a terrible change that will affect them all. Something dormant for ten years is breaking free, and once

again the aftershocks of an ancient war will focus on this watery world. And Sniper, for ten years the Warden of Spatterjay, finally takes delivery of his new drone shell. It's much better than his old one: powerful engines, more lethal weapons, thicker armour. He's going to need them.

"What the future fortunes of [Gramsci's] writings will be, we cannot know. However, his permanence is already sufficiently sure, and justifies the historical study of his international reception. The present collection of studies is an indispensable foundation for this." —Eric Hobsbawm, from the preface Antonio

Gramsci is a giant of Marxian thought and one of the world's greatest cultural critics. Antonio A. Santucci is perhaps the world's preeminent Gramsci scholar. Monthly Review Press is proud to publish, for the first time in English, Santucci's masterful intellectual biography of the great Sardinian scholar and revolutionary. Gramscian terms such as "civil society" and "hegemony" are much used in everyday political discourse. Santucci warns us, however, that these words have been appropriated by both radicals and conservatives for contemporary and often self-serving ends that often have nothing to do with Gramsci's purposes in developing them. Rather what we must do, and what Santucci illustrates time and again in his dissection of Gramsci's writings, is absorb Gramsci's methods. These can be summed up as the suspicion of "grand explanatory schemes," the unity of theory and practice, and a focus on the details of everyday life. With respect to the last of these, Joseph Buttigieg says in his *Nota*: "Gramsci did not set out to explain historical reality armed with some full-fledged concept, such as hegemony; rather, he examined the minutiae of concrete social, economic, cultural, and political relations as they are lived in by individuals in their specific historical circumstances and, gradually, he acquired an increasingly complex understanding of how hegemony operates in many diverse ways and under many aspects within the capillaries of society." The rigor of Santucci's examination of Gramsci's life and work matches that of the seminal thought of the master himself. Readers will be enlightened and inspired by every page.

Plumbing cross-connections, which are defined as actual or potential connections between a potable and nonpotable water supply, constitute a serious public health hazard. There are numerous, well documented cases where cross-connections have been responsible for contamination of drinking water, and have resulted in the spread of disease. The problem is a dynamic one, because piping systems are continually being installed, altered, or extended. Control of cross-connections is possible, but only through thorough knowledge and vigilance. Education is essential, for even those who are experienced in piping installations fail to recognize cross-connection possibilities and dangers. All municipalities with public water supply systems should have cross-connection control programs. Those responsible for institutional or private water supplies should also be familiar with the dangers of cross-connections and should exercise careful surveillance of their systems.

In 1959, Doyle Dane Bernbach, the New York advertising agency was appointed to handle the Volkswagen account in the USA. The advertisements they produced through the sixties and early seventies changed the face of advertising, not just in America but across the world. Remember those great Volkswagen ads? looks briefly at the events surrounding the birth of the campaign and the car, and shows many of the highly acclaimed advertisements produced by the agency. This book has been written and compiled by Alfredo Marcantonio, Copywriter and one-time Advertising Manager of VWGB Ltd, John O'Driscoll, Art Director of many British Volkswagen ads, and David Abott, an ex-Creative and Managing Director of DDB's London office. They decided to put the book together some 20 years ago as "to let the Beetle and its advertising pass on without a permanent record seemed a crying shame". This book is a story of the car and its advertising. In a unique way the two were indistinguishable ? the charming, honest advertising became part of the charm and honesty of the car. If you ever owned a Beetle, if you've ever chuckled at a Volkswagen advertisement, or if you simply appreciate wit and style, you will enjoy this book. It's
