This student-friendly grammar guide helps students recognize, correct, and avoid the most common and serious grammar and usage errors. The text breaks complex concepts down into simple lessons, each focusing on a single essential skill. Everyday language and easy-to-remember tips make grammar easy to understand, and clear examples and diagrams show, rather than just tell, how to identify and correct problems. Hundreds of exercises in the book and thousands more at Exercise Central provide students with plentiful practice.

## **A Commonsense Guide to Grammar and Usage with 2009 MLA Update**

The powerful story of a college basketball team who carried an era's brightest hopes--racial harmony, social mobility, and the triumph of the underdog--but whose success was soon followed by a shocking downfall The unlikeliest of champions, the 1949-50 City College Beavers were extraordinary by every measure. City College was a tuition-free, merit-based college in Harlem known far

more for its intellectual achievements and political radicalism than its athletic prowess. Only two years after Jackie Robinson broke the Major League Baseball color barrier--and at a time when the National Basketball Association was still segregated--every single member of the Beavers was either Jewish or African American. But during that remarkable season, under the guidance of the legendary former player Nat Holman, this unheralded group of city kids would stun the basketball world by becoming the only team in history to win the NIT and NCAA tournaments in the same year. This team, though, proved to be extraordinary in another way: During the following season, all of the team's starting five were arrested by New York City detectives, charged with conspiring with gamblers to shave points. Almost overnight these beloved heroes turned into fallen idols. The story centers on two teammates and close friends, Eddie Roman and Floyd Layne, one white, one black, each caught up in the scandal, each searching for a path to personal redemption. Though banned from the NBA, Layne continued to devote himself to basketball, teaching the game to young people in his Bronx neighborhood and, ultimately, with Roman's help, finding another kind of triumph--one that no one could have anticipated. Drawing on interviews with the surviving members of that championship team, Matthew Goodman has created an indelible portrait of an era of smoke-filled arenas and Borscht Belt hotels, when college basketball was far more popular than the professional game. It was a time when gangsters controlled illegal sports betting, the police were on their payroll, and everyone, it seemed, was getting rich--except for the young men who actually

played the games. Tautly paced and rich with period detail, *The City Game* tells a story both dramatic and poignant: of political corruption, duplicity in big-time college sports, and the deeper meaning of athletic success.

### **We the People**

Recommended by the Common Core State Standards for English Language Arts and Literacy as an exemplary informational text. A History of US is a 10-volume, award-winning series about the birth and development of the United States as related by master storyteller Joy Hakim. *All the People*, the last volume in the series, covers US History from the end of World War II to the present. This updated fourth edition covers, for the first time, events that have taken place in the past 6 years, including the 2008 election of Barack Obama and the significance of this election. *All the People* focuses on Civil Rights in the last half of the 20th Century and the beginning of the 21st, ensuring that readers will have a firm grasp of the groundbreaking nature and lasting importance of this movement. Throughout the book, which has been completely redesigned with a bold new look, Hakim portrays contemporary American life in a lively, engaging way. Readers will encounter fascinating stories about famous Americans (Joe McCarthy, Martin Luther King, Jr., Richard Nixon), historical events (the Vietnam War, the first man on the moon), and major cultural movements (1960s counterculture, feminism). Interspersed features provide further anecdotes about the characters that have shaped the last

65 years--for instance, one conjectures about what Alan Greenspan might hide in his briefcase; another discusses the life and times of Mark I, the world's first automatic computer. Sidebars, illustrations, definitions and quotes line the margins, providing illimitable sources of information and entertainment. About the Series: Master storyteller Joy Hakim has excited millions of young minds with the great drama of American history in her award-winning series A History of US. Recommended by the Common Core State Standards for English Language Arts and Literacy as an exemplary informational text, A History of US weaves together exciting stories that bring American history to life. Hailed by reviewers, historians, educators, and parents for its exciting, thought-provoking narrative, the books have been recognized as a break-through tool in teaching history and critical reading skills to young people. In ten books that span from Prehistory to the 21st century, young people will never think of American history as boring again.

This contemporary oral history, based on interviews conducted over an 18-year period, is the first of its kind in English. The interviews, some repeated with the same subjects over years, demonstrate how the Jewish community of Dijon has evolved over time in response to challenges both internal and external. The authors provide an introduction to the series of interviews as well as a detailed history of the community. A chronology, a map of Dijon, and photos of many interviewees are included. The book also provides an update on recent events in the community, a suggested reading list, and a bibliography.

Gone are the days when the term diversity may have been used to solely signify the color of one's skin or gender. This volume examines how diverse and marginalized populations are situated within American community colleges and pushes the boundaries of our understanding of these terms. The editors and contributing authors examine various student groups as well as give voice to the marginalization felt by a group of faculty. Topics include: Examining the concept of student marginalization through a framework based on Dewey's 1916 work, *Democracy and Education* Experiences of Adult English as Second Language learners Seeing the community college environment through the eyes of student athletes Current research on lesbian, gay, bisexual, transgender, and queer (LGBTQ) community college students and the need for more Student Veterans Underprepared college students and community College faculty in correctional institutions. The volume concludes with key resources for anyone who works with or researches marginalized populations. The resources include sources

for further reading, existing organizations serving various marginalized groups, and some possible funding opportunities. This is the 155th volume of the Jossey-Bass quarterly report series New Directions for Community Colleges. Essential to the professional libraries of presidents, vicepresidents, deans, and other leaders in today's open-door institutions, New Directions for Community Colleges provides expert guidance in meeting the challenges of their distinctive and expanding educational mission.

### **A Winter of Words**

Most people outside of the art world view art as something that is foreign to their experiences and everyday lives. *A People's Art History of the United States* places art history squarely in the rough-and-tumble of politics, social struggles, and the fight for justice from the colonial era through the present day. Author and radical artist Nicolas Lampert combines historical sweep with detailed examinations of individual artists and works in a politically charged narrative that spans the conquest of the Americas, the American Revolution, slavery and abolition, western expansion, the suffragette movement and feminism, civil rights movements, environmental movements, LGBT movements, antiglobalization movements, contemporary antiwar movements, and beyond. *A People's Art History of the United States* introduces us to key works of American radical art alongside dramatic retellings of the histories that inspired them. Stylishly illustrated with over two hundred images, this book is nothing less than an alternative education for anyone interested in the powerful role that art plays in our society.

### **Living for the City**

*Party Music* explores the culture and politics of the Black Power era of the late 1960s, when the rise of a black militant movement also gave rise to a "Black Awakening" in the arts--and especially in music. Here Rickey Vincent, the award-winning author of *Funk*, explores the relationship of soul music to the Black Power movement from the vantage point of the musicians and black revolutionaries

themselves. Party Music introduces readers to the Black Panther's own band, the Lumpen, a group comprised of rank-and-file members of the Oakland, California-based Party. During their year-long tenure, the Lumpen produced hard-driving rhythm-and-blues that asserted the revolutionary ideology of the Black Panthers. Through his rediscovery of the Lumpen, and based on new interviews with Party and band members, Vincent provides an insider's account of black power politics and soul music aesthetics in an original narrative that reveals more detail about the Black Revolution than ever before. Rickey Vincent is the author of *Funk: The Music, The People, and the Rhythm of the One*, and has written for the *Washington Post*, *American Legacy*, and the *Los Angeles Review of Books*. He teaches at the University of California, Berkeley.

### **City College of San Francisco**

In this nuanced and groundbreaking history, Donna Murch argues that the Black Panther Party (BPP) started with a study group. Drawing on oral history and untapped archival sources, she explains how a relatively small city with a recent history of African American settlement produced such compelling and influential forms of Black Power politics. During an era of expansion and political struggle in California's system of public higher education, black southern migrants formed the BPP. In the early 1960s, attending Merritt College and other public universities radicalized Huey Newton, Bobby Seale, and many of the young people who joined the Panthers' rank and file. In the face of social crisis and police violence, the most disfranchised sectors of the East Bay's African American community--young, poor, and migrant--challenged the legitimacy of state authorities and of an older generation of black leadership. By excavating this hidden history, Living for the

City broadens the scholarship of the Black Power movement by documenting the contributions of black students and youth who created new forms of organization, grassroots mobilization, and political literacy.

The searing, visionary memoir of founding Black Panther Huey P. Newton, in a dazzling graphic package Tracing the birth of a revolutionary, Huey P. Newton's famous and oft-quoted autobiography is as much a manifesto as a portrait of the inner circle of America's Black Panther Party. From Newton's impoverished childhood on the streets of Oakland to his adolescence and struggles with the system, from his role in the Black Panthers to his solitary confinement in the Alameda County Jail, Revolutionary Suicide is unrepentant and thought-provoking in its portrayal of inspired radicalism. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. New York City College of Technology, known today as City Tech, traces its earliest roots to the trade school movement, which was supported by both organized labor and industry. Opening in February 1947 as the New York State Institute of Applied Arts and Sciences, the school served the needs of returning GIs and others in need of employment training. City Tech trained United States Air Force personnel in its employment-oriented programs, including the first college-based program in the country in restorative dentistry. City Tech became the first public community college in New York, and in 1981, it became the senior college of technology of The City University of New York. Today City Tech is the largest public college of technology in the Northeast and the most diverse. New York City College of Technology highlights the history of this vibrant institution that has continually served the needs of both its students and its city.

As in previous editions, the focus in PREALGEBRA & INTRODUCTORY ALGEBRA

remains on the Aufmann Interactive Method (AIM). Students are encouraged to be active participants in the classroom and in their own studies as they work through the How To examples and the paired Examples and You Try It problems. Student engagement is crucial to success. Presenting students with worked examples, and then providing them with the opportunity to immediately solve similar problems, helps them build their confidence and eventually master the concepts. Simplicity is key in the organization of this edition, as in all other editions. All lessons, exercise sets, tests, and supplements are organized around a carefully constructed hierarchy of objectives. Each exercise mirrors a preceding objective, which helps to reinforce key concepts and promote skill building. This clear, objective-based approach allows students to organize their thoughts around the content, and supports instructors as they work to design syllabi, lesson plans, and other administrative documents. New features like Focus on Success, Apply the Concept, and Concept Check add an increased emphasis on study skills and conceptual understanding to strengthen the foundation of student success. The Third Edition also features a new design, enhancing the Aufmann Interactive Method and making the pages easier for both students and instructors to follow. Few issues created greater consensus among Civil War-era northerners than the belief that the secessionists had committed treason. But as William A. Blair shows in this engaging history, the way politicians, soldiers, and civilians dealt with disloyalty varied widely. Citizens often moved more swiftly than federal agents in punishing traitors in their midst, forcing the government to rethink legal practices and definitions. In reconciling the northern contempt for treachery with a demonstrable record of judicial leniency toward the South, Blair illuminates the other ways that northerners punished perceived traitors, including confiscating slaves, arresting newspaper editors for expressions of free speech, and limiting voting. Ultimately, punishment for treason extended well beyond wartime and into the framework of Reconstruction policies, including the construction of the Fourteenth Amendment. Establishing how treason was defined not just by the Lincoln administration, Congress, and the courts but also by the general public, Blair reveals the surprising implications for North and South alike.

With an annual student population of more than 100,000, City College of San Francisco has educated one in seven city residents and has alumni in every state. A Depression-era dream of Archibald Cloud, the college opened in 1935 with 1,483 students and no central campus. Today the college not only has a main campus at Ocean and Phelan Avenues, but also has 10 others spread throughout San Francisco. Science Hall, designed by Timothy Pflueger, proudly stands on the hill, a visible landmark beckoning students to walk through its portals. Pflueger's dream also included the incorporation of art into his buildings. His organization of the Art in Action program at the 1939-1940 Golden Gate International Exposition on Treasure Island resulted in the acquisition of Mexican muralist Diego Rivera's Pan American Unity, as well as mosaics and sculptures by other artists that adorn Science Hall.

In 2012, the accreditor sanctioned City College of San Francisco, one of the biggest and best community colleges in the country, and a year later proposed terminating its accreditation, leading to a state takeover. *Free City!* follows the multipronged strategies of the campaign and the diverse characters that carried them out. Teachers, students, labor unions, community groups, public officials, and concerned individuals saved a treasured public institution as San Francisco's working-class communities of color battled the gentrification that was forcing them out of the city. And they pushed back against the national "reform" agenda of corporate workforce training that drives students towards debt and sidelines lifelong learning and community service programs. Combining analysis with narrative, *Free City!* offers a case study in the power of positive vision and solution-oriented organizing and a reflection on what education can and should be.

Guide to Surviving a City University: From A Student to A Student is a self-help book for students in the CUNY system. The City University of New York, or CUNY, is the public university system of New York City. The advice in this book, coming from another student, will guide those who do not like going to counselors. It tells how to deal with professors, handle group work at college level, and how to work within your college, as opposed to fighting back and getting nowhere. The guide also tells how to go from school to school within the CUNY system. Author Katharina Rollins discusses what every college student should know. Guide to Surviving a City University covers "every crazy situation that I went through in college as far as bad grades, dealing with annoying non-working group mates, having professors think they have all this power and there is nothing a student can do about it. I have gone

to department chairs. I have talked to professors about group mates. I have done it all."

In this long-awaited book from the rising superstar of sportswriting, whose blog "The Edge of Sports" is read each week by thousands of people across the country, Dave Zirin offers a riotously entertaining chronicle of larger-than-life sporting characters and dramatic contests and what amounts to an alternative history of the United States as seen through the games its people played. Through Zirin's eyes, sports are never mere games, but a reflection of—and spur toward—the political conflicts that shape American society. Half a century before Jackie Robinson was born, the black ballplayer Moses Fleetwood Walker brandished a revolver to keep racist fans at bay, then took his regular place in the lineup. In the midst of the Depression, when almost no black athletes were allowed on the U.S. Olympic team, athletes held a Counter Olympics where a third of the participants were African American. *A People's History of Sports in the United States* is replete with surprises for seasoned sports fans, while anyone interested in history will be amazed by the connections Zirin draws between politics and pop flies. As Jeff Chang, author of *Can't Stop Won't Stop*, puts it, "After you read him, you'll never see sports the same way again."
