The Portable Pediatrician for Parents

Growing up is a whole lot easier if you have some idea what to expect. This book describes exactly what will happen to your body in a straightforward, easy-to-understand way, and it explains some of your feelings too - all you need to know for this important time in your life. This is a highly illustrated ebook that can only be read on the Kindle Fire or other tablet. "Look no further: the What's Happening to Me? Books are nothing short of brilliant. They aim to help children aged nine and above understand bodily changes and they do this extremely well. Susan Meredith answers the questions young girls want to ask but might feel afraid to. It's all there: getting measured up for a bra, periods, using towels and tampons, feeling, diet, health and hygiene and there is also a section on what happens to boys. The text is informal, chatty, full of useful facts and packed with considerate advice and support. A book like that wouldn't work as well without graphics and diagrams, and the illustrations are colourful and engaging as well as informative." - John Dabell, TES Magazine

In Defense of Looting

"When it comes to YA suspense, Karen M. McManus is in a league of her own. Fresh off her best-selling breakout *One of Us Is Lying* . . . the author has returned with a juicy second novel. It's even better than what came before." --EW
The New York Times bestselling "must-read YA thriller" (Bustle) from the author of *One of Us Is Lying*! Echo Ridge is small-town America. Ellery's never been there, but she's heard all about it. Her aunt went missing there at age seventeen. And only five years ago, a homecoming queen put the town on the map when she was killed. Now Ellery has to move there to live with a grandmother she barely knows. The town is picture-perfect, but it's hiding secrets. And before school even begins for Ellery, someone has declared open season on homecoming, promising to make it as dangerous as it was five years ago. Then, almost as if to prove it, another girl goes missing. Ellery knows all about secrets. Her mother has them; her grandmother does too. And the longer she's in Echo Ridge, the clearer it becomes that everyone

there is hiding something. The thing is, secrets are dangerous--and most people aren't good at keeping them. Which is why in Echo Ridge, it's safest to keep your secrets to yourself. 2 STARRED REVIEWS! Praise for Karen M. McManus's *One of Us Is Lying* A New York Times Bestseller An EW.com Best YA Book of the Year A BuzzFeed Best YA Book of the Year A Popcrush Best Young Adult Book of the Year "Pretty Little Liars meets *The Breakfast Club*.so make room for *One of Us Is Lying* in your bags, because this is one carry-on you won't want to put down." --EW.com "A whodunit with a *Breakfast Club* twist following four unique voices on a chase to find the killer, this one will keep you guessing until the very, very end." --Popcrush "This is no ordinary whodunit surprising and relevant."--USA Today

What's Happening to My Body? Book for Girls

A neuroscientist shatters the myths about gender differences, arguing that the brains of boys and girls are largely shaped by how they spend their time, in a book where she offers parents and teachers concrete ways to avoid reinforcing harmful stereotypes.

What's the Matter with Kansas?

"Alison Gopnik, a developmental psychologist, [examines] the paradoxes of parenthood from a scientific perspective"--

Regression

NEW YORK TIMES BESTSELLER Edward Snowden, the man who risked everything to expose the US government's system of mass surveillance, reveals for the first time the story of his life, including how he helped to build that system and what motivated him to try to bring it down. In 2013, twenty-nine-year-old Edward Snowden shocked the world when he broke with the American intelligence establishment and revealed that the United States government was secretly pursuing the means to collect every single phone call, text message, and email. The result would be an unprecedented system of mass surveillance with the ability to pry into the private lives of every person on earth. Six years later, Snowden reveals for the very first time how he helped to build this system and why he was moved to expose it. Spanning the bucolic Beltway suburbs of his childhood and the clandestine CIA and NSA postings of his adulthood, *Permanent Record* is the extraordinary account of a bright young man who grew up online—a man who became a spy, a whistleblower, and, in exile, the Internet's conscience. Written with wit, grace, passion, and an unflinching candor, *Permanent Record* is a crucial memoir of our digital age and destined to be a classic.

What's Happening to Me?

The National Book Award Finalist and New York Times bestseller that became a guide and balm for a country struggling to understand the election of Donald Trump "A generous but disconcerting look at the Tea Party. . . . This is a smart, respectful and compelling book." —Jason DeParle, *The New York Times Book Review* When Donald Trump won the 2016 presidential election, a bewildered

nation turned to *Strangers in Their Own Land* to understand what Trump voters were thinking when they cast their ballots. Arlie Hochschild, one of the most influential sociologists of her generation, had spent the preceding five years immersed in the community around Lake Charles, Louisiana, a Tea Party stronghold. As Jedediah Purdy put it in the *New Republic*, "Hochschild is fascinated by how people make sense of their lives. . . . [Her] attentive, detailed portraits . . . reveal a gulf between Hochschild's 'strangers in their own land' and a new elite." Already a favorite common read book in communities and on campuses across the country and called "humble and important" by David Brooks and "masterly" by Atul Gawande, Hochschild's book has been lauded by Noam Chomsky, New Orleans mayor Mitch Landrieu, and countless others. The paperback edition features a new afterword by the author reflecting on the election of Donald Trump and the other events that have unfolded both in Louisiana and around the country since the hardcover edition was published, and also includes a readers' group guide at the back of the book.

The Road

Tom notices that his body is changing. Tom's voice is different and hair is growing in new places. There are other changes happening too. Tom learns that he has started growing into a man. Following Tom as he begins to notice changes to his body, this simple resource helps parents and carers teach boys with autism or other special needs about puberty. It covers all the changes that they will experience, both emotional such as new feelings and physical such as wet dreams. This fully illustrated positive and entertaining book provides the perfect opportunity to talk about puberty with boys and young men with autism or special needs.

What's Going on in There?

The "What's Happening to My Body?" Book for Girls Written by experienced educator and her daughter in a reassuring and down-to-earth style, The "What's Happening to My Body?" Book for Girls gives sensitive straight talk on: the body's changing size and shape; the growth spurt; breast development; the reproductive organs; the menstrual cycle; body hair; diet and exercise; romantic and sexual feelings; and puberty in the opposite sex. It also includes information on anorexia and bulimia, sexually transmitted diseases, AIDS, and birth control. Featuring detailed illustrations and real-life stories throughout, plus an introduction for parents and a helpful resource section, this bestselling growing-up is an essential puberty education and health book for all girls ages 10 and up.

You're Not Listening

"The single most resonant and carefully imagined book of Dick's career." —*New York Times* It's America in 1962. Slavery is legal once again. The few Jews who still survive hide under assumed names. In San Francisco, the I Ching is as common as the Yellow Pages. All because some twenty years earlier the United States lost a war—and is now occupied by Nazi Germany and Japan. This harrowing, Hugo Award-winning novel is the work that established Philip K. Dick as an innovator in

science fiction while breaking the barrier between science fiction and the serious novel of ideas. In it Dick offers a haunting vision of history as a nightmare from which it may just be possible to wake. Winner of the Hugo Award

The What's Happening to My Body? Book for Boys

Everyone agrees that what we do in schools should be based on what we know about how the brain learns. Until recently, however, we have had few clues to unlock the secrets of the brain. Now, research from the neurosciences has greatly improved our understanding of the learning process, and we have a much more solid foundation on which to base educational decisions. In this completely revised and updated second edition, Patricia Wolfe clarifies how we can effectively match teaching practice with brain functioning. Encompassing the most recent and relevant research and knowledge, this edition also includes three entirely new chapters that examine brain development from birth through adolescence and identify the impact of exercise, sleep, nutrition, and technology on the brain. Brain Matters begins with a "mini-textbook" on brain anatomy and physiology, bringing the biology of the brain into context with teaching and learning. Wolfe describes how the brain encodes, manipulates, and stores information, and she proposes implications that recent research has for practice—why meaning is essential for attention, how emotion can enhance or impede learning, and how different types of rehearsal are necessary for different types of learning. Finally, Wolfe introduces and examines practical classroom applications and brain-compatible teaching strategies that take advantage of simulations, projects, problem-based learning, graphic organizers, music, active engagement, and mnemonics. These strategies are accompanied by actual classroom scenarios—spanning the content areas and grade levels from lower elementary to high school—that help teachers connect theory with practice.

Why Your Parents Are Driving You Up the Wall and What To Do About It

Discusses the mental and physical changes that take place during puberty.

Brain Matters

A step-by-step guide to the first five years of life for parents who want the most balanced coverage of behavioral and medical issues -- from the pen of a highly esteemed pediatrician.

American Dirt (Oprah's Book Club)

Ambition will fuel him. Competition will drive him. But power has its price.

We're Going on a Bear Hunt

A latest entry in the series that includes It's NOT the Stork! follows the adventures of young Gus and Nellie, who watch their mother's pregnancy and anticipate the arrival of a new sibling while learning engaging facts about how unborn babies

develop.

What's Going on Out There?

#1 New York Times Bestseller OPRAH'S BOOK CLUB PICK "Extraordinary."
—Stephen King "This book is not simply the great American novel; it's the great novel of las Americas. It's the great world novel! This is the international story of our times. Masterful." —Sandra Cisneros También de este lado hay sueños. On this side, too, there are dreams. Lydia Quixano Pérez lives in the Mexican city of Acapulco. She runs a bookstore. She has a son, Luca, the love of her life, and a wonderful husband who is a journalist. And while there are cracks beginning to show in Acapulco because of the drug cartels, her life is, by and large, fairly comfortable. Even though she knows they'll never sell, Lydia stocks some of her all-time favorite books in her store. And then one day a man enters the shop to browse and comes up to the register with a few books he would like to buy—two of them her favorites. Javier is erudite. He is charming. And, unbeknownst to Lydia, he is the jefe of the newest drug cartel that has gruesomely taken over the city. When Lydia's husband's tell-all profile of Javier is published, none of their lives will ever be the same. Forced to flee, Lydia and eight-year-old Luca soon find themselves miles and worlds away from their comfortable middle-class existence. Instantly transformed into migrants, Lydia and Luca ride la bestia—trains that make their way north toward the United States, which is the only place Javier's reach doesn't extend. As they join the countless people trying to reach el norte, Lydia soon sees that everyone is running from something. But what exactly are they running to? American Dirt will leave readers utterly changed. It is a literary achievement filled with poignancy, drama, and humanity on every page. It is one of the most important books for our times. Already being hailed as "a Grapes of Wrath for our times" and "a new American classic," Jeanine Cummins's American Dirt is a rare exploration into the inner hearts of people willing to sacrifice everything for a glimmer of hope.

What's out there?

A fireman in charge of burning books meets a revolutionary school teacher who dares to read. Depicts a future world in which all printed reading material is burned.

What's Happening to Tom?

As a research neuroscientist, Lise Eliot has made the study of the human brain her life's work. But it wasn't until she was pregnant with her first child that she became intrigued with the study of brain development. She wanted to know precisely how the baby's brain is formed, and when and how each sense, skill, and cognitive ability is developed. And just as important, she was interested in finding out how her role as a nurturer can affect this complex process. How much of her baby's development is genetically ordained--and how much is determined by environment? Is there anything parents can do to make their babies' brains work better--to help them become smarter, happier people? Drawing upon the exploding research in this field as well as the stories of real children, What's Going On in

There? is a lively and thought-provoking book that charts the brain's development from conception through the critical first five years. In examining the many factors that play crucial roles in that process, *What's Going On in There?* explores the evolution of the senses, motor skills, social and emotional behaviors, and mental functions such as attention, language, memory, reasoning, and intelligence. This remarkable book also discusses: how a baby's brain is "assembled" from scratch the critical prenatal factors that shape brain development how the birthing process itself affects the brain which forms of stimulation are most effective at promoting cognitive development how boys' and girls' brains develop differently how nutrition, stress, and other physical and social factors can permanently affect a child's brain Brilliantly blending cutting-edge science with a mother's wisdom and insight, *What's Going On in There?* is an invaluable contribution to the nature versus nurture debate. Children's development is determined both by the genes they are born with and the richness of their early environment. This timely and important book shows parents the innumerable ways in which they can actually help their children grow better brains. From the Hardcover edition.

Strangers in Their Own Land

LOS ANGELES TIMES BESTSELLER The problem is not overpolicing, it is policing itself. Why we need to defund the police and how we get there. Recent weeks have seen an explosion of protest against police brutality and repression. Among activists, journalists and politicians, the conversation about how to respond and improve policing has focused on accountability, diversity, training, and community relations. Unfortunately, these reforms will not produce results, either alone or in combination. The core of the problem must be addressed: the nature of modern policing itself. This book attempts to spark public discussion by revealing the tainted origins of modern policing as a tool of social control. It shows how the expansion of police authority is inconsistent with community empowerment, social justice— even public safety. Drawing on groundbreaking research from across the world, and covering virtually every area in the increasingly broad range of police work, Alex Vitale demonstrates how law enforcement has come to exacerbate the very problems it is supposed to solve. In contrast, there are places where the robust implementation of policing alternatives—such as legalization, restorative justice, and harm reduction—has led to a decrease in crime, spending, and injustice. The best solution to bad policing may be an end to policing.

What's Happening to Me? (Girls)

One of "our most insightful social observers"* cracks the great political mystery of our time: how conservatism, once a marker of class privilege, became the creed of millions of ordinary Americans With his acclaimed wit and acuity, Thomas Frank turns his eye on what he calls the "thirty-year backlash"—the populist revolt against a supposedly liberal establishment. The high point of that backlash is the Republican Party's success in building the most unnatural of alliances: between blue-collar Midwesterners and Wall Street business interests, workers and bosses, populists and right-wingers. In asking "what 's the matter with Kansas?"—how a place famous for its radicalism became one of the most conservative states in the union—Frank, a native Kansan and onetime Republican, seeks to answer some broader American riddles: Why do so many of us vote against our economic

interests? Where's the outrage at corporate manipulators? And whatever happened to middle-American progressivism? The questions are urgent as well as provocative. Frank answers them by examining pop conservatism—the bestsellers, the radio talk shows, the vicious political combat—and showing how our long culture wars have left us with an electorate far more concerned with their leaders' "values" and down-home qualities than with their stands on hard questions of policy. A brilliant analysis—and funny to boot—What's the Matter with Kansas? presents a critical assessment of who we are, while telling a remarkable story of how a group of frat boys, lawyers, and CEOs came to convince a nation that they spoke on behalf of the People. *Los Angeles Times

Fahrenheit 451

Although the human brain has 100 billion nerve cells at birth, newborns are capable of little beyond the most vital functions like breathing and sucking. The infant's ability to see, hear, touch, smell and taste is primitive. Higher cognitive functions like attention, reasoning, language and conscious memory are absent. Scientific research proves that a baby's brain cells are only weakly connected. What firms up these connections are the experiences and stimulation the baby receives in the critical first five years.

What's in There?

A scientific work made accessible for lay readers--without sacrificing its technical and scholarly underpinnings--this book presents regression as a universal and necessary process. Regression is viewed as inherent in our biology and designed as an aid to integration of trauma through repetitive association and reassociation. Childhood sexuality's definition includes touching patterns, sensate reactions to urination and defecation, and spanking and other forms of abuse. Infantile reactions to pleasure and pain create memory traces that are cued during later adult sexual encounters. Sexual dysfunction and paraphilic conditions such as masochism, sadism, fetishism, and exhibitionism often develop as a result of these early sensate memories. This work describes how parents, educators, therapists and medical caregivers contribute to mis-learning by failing to recognize and understand the sensitive nature of learning and the remediative process of regression. Graphic descriptions of severe, moderate, and mild cases of regression are presented. Doyle challenges the notion that regression is only a psychological defense utilized by a limited segment of the population. This book combines concepts drawn from learning theory, neuroscience, neuropsychology, child development, and trauma revival in an unprecedented manner, and aims to stimulate interest in--and exploration of--regression as a phenomena that transcends diagnostic categories, one that recognizes the continuum between normal and abnormal associations we all form in the process of development.

The Gardener and the Carpenter

We're going on a bear hunt. Through the long wavy grass, the thick oozy mud and the swirling, whirling snowstorm - will we find a bear today?

What's Going On Inside My Head?

NATIONAL BESTSELLER WINNER OF THE PULITZER PRIZE The searing, post-apocalyptic novel about a father and son's fight to survive. A father and his son walk alone through burned America. Nothing moves in the ravaged landscape save the ash on the wind. It is cold enough to crack stones, and when the snow falls it is gray. The sky is dark. Their destination is the coast, although they don't know what, if anything, awaits them there. They have nothing; just a pistol to defend themselves against the lawless bands that stalk the road, the clothes they are wearing, a cart of scavenged food—and each other. The Road is the profoundly moving story of a journey. It boldly imagines a future in which no hope remains, but in which the father and his son, "each the other's world entire," are sustained by love. Awesome in the totality of its vision, it is an unflinching meditation on the worst and the best that we are capable of: ultimate destructiveness, desperate tenacity, and the tenderness that keeps two people alive in the face of total devastation. A New York Times Notable Book One of the Best Books of the Year The Boston Globe, The Christian Science Monitor, The Denver Post, The Kansas City Star, Los Angeles Times, New York, People, Rocky Mountain News, Time, The Village Voice, The Washington Post

What's Going on in There?

In this funny, outrageous and empowering book, Dr. Lissa Rankin answers all the secret gynecological questions that most women wonder about, but have always been afraid to ask. Suppose you had a wise, warm, funny best friend—who just happened to be a gynecologist. You're out with the girls for cocktails and the conversation turns to sex, and then to girly parts. One by one, you start asking her all the questions you've secretly wondered about—and discover that you have a lot in common. If you were to write those questions down, then you'd have *What's Up Down There?*, a life-changing little book that answers: - Do old ladies have saggy vaginas? - How do male gynecologists have a sex life without feeling like they're stuck at the office? - Is it normal for your inner labia to hang out of your outer labia? - Can the baby feel its mom having sex during pregnancy? - How common is it for one's boobs to be two totally different sizes? And so much more! As outrageously funny as it is empowering, this book reveals how to love yourself and your body—and will have you recommending it to every woman you know. From off-the-wall sex questions to serious topics of women's sexual health, *What's Up Down There?* provides answers to women of all ages and stages.

The Philosophical Baby

If you thought regular marriages were insane, wait until you see the contract Viola signed! Our heroine, the daughter of an earl, signed herself away in a marriage contract to an aloof duke, Cersis, in order to save her family from a lifetime of poverty. All of a sudden, Viola's life is turned upside down when she moves into the Fisar family's manor and is left to negotiate her new life as a "show wife" in a world she had only ever caught glimpses of before. How will she shake things up at the Fisar estate?

Wakeupnigga

For more than twenty years, What's Happening to Me? has helped parents explain puberty to their children who are experiencing "growing pains". More than one million children and young adults have enjoyed the humor and honesty in this book, while learning what really happens to their bodies as they mature. Peter Mayle and Arthur Robins are the bestselling team also responsible for Where Did I Come From?

What's Up Down There?

Discusses the changes that take place in a boy's body during puberty, including information on the body's changing size and shape, the growth spurt, reproductive organs, pubic hair, beards, pimples, voice changes, wet dreams, and puberty in girls.

Reflective Parenting

In this evangelistic booklet the reader is encouraged to think seriously about the eternal truths of God's righteous anger and judgment. This is done through a biblical perspective upon the current world situation and how it effects our society.

What's Going on Down There?

Have you ever wondered what's going on in your child's mind? This engaging book shows how reflective parenting can help you understand your children, manage their behaviour and build your relationship and connection with them. It is filled with practical advice showing how recent developments in mentalization, attachment and neuroscience have transformed our understanding of the parent-child relationship and can bring meaningful change to your own family relationships. Alistair Cooper and Sheila Redfern show you how to make a positive impact on your relationship with your child, starting from the development of the baby's first relationship with you as parents, to how you can be more reflective in relationships with toddlers, children and young people. Using everyday examples, the authors provide you with practical strategies to develop a more reflective style of parenting and how to use this approach in everyday interactions to help your child achieve their full potential in their development; cognitively, emotionally and behaviourally. Reflective Parenting is an informative and enriching read for parents, written to help parents form a better relationship with their children. It is also an essential resource for clinicians working with children, young people and families to support them in managing the dynamics of the child-parent relationship. This is a book that every parent needs to read.

The Man in the High Castle

A half-century ago America was embroiled in a quagmire thousands of miles away from our shores that split the nation in two. Based upon extensive research and interviews, this book chronicles the history of that tempestuous timeframe. The author's succinct yet elegant writing style makes complex issues readily palatable

to the knowledge thirsty reader. Relying heavily on oral history, the author offers a rich portrait of the Vietnam Era. Older readers will appreciate the book for its ability to help put a complex period of their lives into clearer perspective. Young people will be able to appreciate the deep implications of the Era and the impact that it had on our society. There are valuable lessons shared in this work that are fully applicable today including the power of organization that helped to not only end a senseless war but also served as a catalyst for significant cultural changes.

Good to Great

A fresh argument for rioting and looting as our most powerful tools for dismantling white supremacy Looting--a crowd of people publicly, openly, and directly seizing goods--is one of the more extreme actions that can take place in the midst of social unrest. Even self-identified radicals distance themselves from looters, fearing that violent tactics reflect badly on the broader movement. But Vicky Osterweil argues that stealing goods and destroying property are direct, pragmatic strategies of wealth redistribution and improving life for the working class--not to mention the brazen messages these methods send to the police and the state. All our beliefs about the innate righteousness of property and ownership, Osterweil explains, are built on the history of anti-Black, anti-Indigenous oppression. From slave revolts to labor strikes to the modern-day movements for climate change, Black lives, and police abolition, Osterweil makes a convincing case for rioting and looting as weapons that bludgeon the status quo while uplifting the poor and marginalized. In *Defense of Looting* is a history of violent protest sparking social change, a compelling reframing of revolutionary activism, and a practical vision for a dramatically restructured society.

The End of Policing

A study of how the human brain forms in the first five years of life describes the critical period of development a child goes through and what parents can do to help their children's brains develop. Reprint. 30,000 first printing.

what's going on

'A wonderfully useful book, told with wit and wisdom' - Adam Kay, best-selling author of *THIS IS GOING TO HURT* "Get up or you'll miss the best part of the day!" "You treat this place like a hotel." "Can you just put that phone down for one minute?!" After years of reliable performance, has something recently gone wrong with your parents? Do you find yourself stressed out, arguing about the most ridiculous things? Is it like you're processing the same world with entirely different brains? Do you and your parents want to fix things? There are hundreds of books for them about how to deal with you. Now, for the first time, doctor of brains and international bestselling author, Dean Burnett has written a book for YOU to understand just what on earth is going on. Like, just WHY are your parents: - Obsessed with tidiness - Not letting you get enough sleep - Just generally not getting anything that's important to you! But don't worry. These are very normal parent malfunctions, and by understanding the science behind where they're coming from, you'll know exactly how to troubleshoot conflict when it occurs (and

even fix it before it does). You'll never be able to remove arguments completely. But imagine what you'd be capable of if you weren't wasting all that time and energy arguing about tidying your room.

"What's Happening To Me?"

When was the last time you listened to someone, or someone really listened to you? "If you're like most people, you don't listen as often or as well as you'd like. There's no one better qualified than a talented journalist to introduce you to the right mindset and skillset—and this book does it with science and humor." -Adam Grant, #1 New York Times bestselling author of *Originals* and *Give and Take* "An essential book for our times." -Lori Gottlieb, New York Times bestselling author of *Maybe You Should Talk to Someone* At work, we're taught to lead the conversation. On social media, we shape our personal narratives. At parties, we talk over one another. So do our politicians. We're not listening. And no one is listening to us. Despite living in a world where technology allows constant digital communication and opportunities to connect, it seems no one is really listening or even knows how. And it's making us lonelier, more isolated, and less tolerant than ever before. A listener by trade, New York Times contributor Kate Murphy wanted to know how we got here. In this always illuminating and often humorous deep dive, Murphy explains why we're not listening, what it's doing to us, and how we can reverse the trend. She makes accessible the psychology, neuroscience, and sociology of listening while also introducing us to some of the best listeners out there (including a CIA agent, focus group moderator, bartender, radio producer, and top furniture salesman). Equal parts cultural observation, scientific exploration, and rousing call to action that's full of practical advice, *You're Not Listening* is to listening what Susan Cain's *Quiet* was to introversion. It's time to stop talking and start listening.

What's Going on in There?

For most of us, having a baby is the most profound, intense, and fascinating experience of our lives. Now scientists and philosophers are starting to appreciate babies, too. The last decade has witnessed a revolution in our understanding of infants and young children. Scientists used to believe that babies were irrational, and that their thinking and experience were limited. Recently, they have discovered that babies learn more, create more, care more, and experience more than we could ever have imagined. And there is good reason to believe that babies are actually smarter, more thoughtful, and even more conscious than adults. This new science holds answers to some of the deepest and oldest questions about what it means to be human. A new baby's captivated gaze at her mother's face lays the foundations for love and morality. A toddler's unstoppable explorations of his playpen hold the key to scientific discovery. A three-year-old's wild make-believe explains how we can imagine the future, write novels, and invent new technologies. Alison Gopnik - a leading psychologist and philosopher, as well as a mother - explains the groundbreaking new psychological, neuroscientific, and philosophical developments in our understanding of very young children, transforming our understanding of how babies see the world, and in turn promoting a deeper appreciation for the role of parents.

Permanent Record

Celebrating twenty years in print, this essential illustrated guidebook for adolescent boys--part manual, part older brother--is now available as a refreshed edition, with new and updated content. With 150,000 copies sold, this appealingly illustrated guidebook to puberty--now updated with brand new content relevant to today's kids--is the perfect companion for boys and parents preparing for this important milestone. Written in consultation with preteen boys, this guide offers a supportive, practical approach, providing clear and sensitive answers to common issues--from what physical changes you might experience, to what puberty is like for girls, to how to handle the sexual feelings you may be starting to experience. This revised edition features new sections on: - body image - sexual harassment and consent - using social media safely Complete with funny and informative interior illustrations, *What's Going on Down There?* will give boys the facts they need to feel confident about this new phase of their lives.

Two Can Keep a Secret

In this lovely picture book Tommy is looking for bugs and he finds many animals doing all sorts of funny things. The book's colorful illustrations are a joy to behold, and the text has a rhythm and rhyme that makes it easy for early learners to remember.

Pink Brain, Blue Brain

We all know that healthy minds are really important but how do we make sure we look after our mental health from a very young age? *What's Going On Inside My Head?* is a book for children that explores practical ways we can keep our minds in good shape as well as our bodies. By talking about positive self-image, emotional intelligence, relationships and mindfulness, this book will help children develop healthy habits and good coping strategies from the start. Presented in a warm, child-friendly but no-nonsense way it will help establish solid foundations for every child's current and future wellbeing. Perfect for starting conversations with children about their mental and emotional health, *What's Going On Inside My Head?* is a must for every parent who understands the importance of keeping a healthy mind.

Can Someone Please Explain What's Going On?! Volume 1

A little bit of this, a little bit of that. Shit, Niggas need to know!

The Ballad of Songbirds and Snakes (A Hunger Games Novel)

The Challenge Built to Last, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the very beginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse

into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? The Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include:

- Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness.
- The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence.
- A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results.
- Technology Accelerators: Good-to-great companies think differently about the role of technology.
- The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap.

"Some of the key concepts discerned in the study," comments Jim Collins, "fly in the face of our modern business culture and will, quite frankly, upset some people." Perhaps, but who can afford to ignore these findings?
