### Stop Farting in the Pyramids

The novel 'Crimes of a Guilty Land' follows the Hart and Beauchamp families through some turbulent years of the nineteenth century. It opens in the summer of 1825 when young Roger Hart, while enjoying his first visit to the beach in Rhode Island, witnesses a tragedy. The events of that day will haunt him for the rest of his life. Many years later, just prior to the Civil War, Roger Hart becomes involved in a risky undertaking to begin to teach the children of slave families in Virginia. That experience leads him to Harpers Ferry and the disastrous John Brown raid on the US Armory in 1859. There he meets the Beauchamp family who became involved in the John Brown affair with tragic results. The Hart and Beauchamp families find themselves bound together with romance and violence as the Civil War devastates the town of Harpers Ferry and as family members find themselves caught up in the Petersbug Battle of the Crater. Both of the families also become involved with a freed slave family that includes a young boy named Brownie. Ten years after the war, Roger finds himself describing all of those events to a curious Brownie. Brownie is anxious to hear his family's story while Hart is determined to pass on to the boy a sense of goodness and a respect for tolerance along with the need for an education. Hart succeeds, and Brownie grows to become a highly regarded teacher. The reader first meets Brownie as he looks back on his life. It is 1941 and America is at war again. But for Brownie, now a retired teacher in West Virginia, an old struggle is still being waged in this country as he witnesses the continued indignity and cruelty of segregation. A moment of violence causes him to reflect on his own life experience and he is drawn to write down his remembrances of his family's involvement in the struggles during the final years of slavery, the John Brown raid at Harpers Ferry, and then the Civil War and its aftermath. He reflects on how his family has experienced drama and tragedy as well as romance and humor during encounters with intolerance - including racial, religious and economic. Brownie recalls the last words of John Brown as he went to the

executioner's gallows. Brown wrote on a slip of paper that "...the crimes of this guilty land will never be purged away but with blood." But after so much blood shed over so many years, Brownie is led to question how much progress has been made during his life time, and then on what a seventy five year old man might be able to contribute to changing things.

Marked by the diversity of its land and the resilience of its people, Harnett County boasts a rich history characterized by military battles and local politics, notable figures and prominent industries, and the commitment of its people to improve their communities for future generations. From the steep hills and swift creeks of the Piedmont to the scrub oaks and barren soil of the Sandhills, from the Mingo Swamp to the Cape Fear River, Harnett County's topography has challenged and inspired newcomers for centuries, strengthening their spirit, hardening their resolve, and shaping each community they created. In the eighteenth century, stalwart pioneers began to establish settlements in the rough and varied landscape of the region that was one day to become Harnett County. Traveling along old Native American trails or following the watery highways of the Cape Fear River and its tributaries, these mainly European settlers-including a large influx of Highland Scots-made their way into the remote interior of the province, where they constructed modest cabins and set about farming the land. Through the years, the people of Harnett joined in the struggles to win freedom from England, to defend the South, and to battle the forces of evil on the other side of the world, but they also fought to build strong communities, such as Erwin, Lillington, and Dunn, and to enhance the daily lives of all county residents. Plank roads and canals, mills and iron works, railroads and academies, all served to connect citizens to the world beyond their doors and to advance the growing prosperity. Situated between the metropolitan cities of Raleigh and Fayetteville, the county begins the new century with a focus on developing industry and fostering the pride so deeply felt by all who call Harnett County home.

This book takes a pragmatic approach to deploying state-of-the-art optical networking equipment in metro-core and backbone networks. The book is oriented towards practical implementation of optical network design. Algorithms and methodologies related to routing, regeneration, wavelength assignment, sub rate-traffic grooming and protection are presented, with an emphasis on optical-bypass-enabled (or all-optical) networks. The author has emphasized the economics of optical networking, with a full chapter of economic studies that offer guidelines as to when and how optical-bypass technology should be deployed. This new edition contains: new chapter on dynamic optical networking and a new chapter on flexible/elastic optical networks. Expanded coverage of new physical-layer technology (e.g., coherent detection) and its impact on network design and enhanced coverage of ROADM architectures and properties, including colorless, directionless, contentionless and gridless. Covers 'hot' topics, such as Software Defined Networking and energy efficiency, algorithmic advancements and techniques, especially in the area of impairment-aware routing and wavelength assignment. Provides more illustrative examples of concepts are provided, using three reference networks (the topology files for the networks are provided on a web site, for further studies by the reader). Also exercises have been added at the end of the chapters to enhance the book's utility as a course textbook.

This book is published by Floricanto Press. [www.FloricantoPress.com](http://www.FloricantoPress.com) Christopher Columbus wanted to prove he'd reached the edge of India. So, when he returned to Spain in 1493, he brought samples of gold, exotic plants, strange birds, and six Taíno "Indians" to the court of Queen Isabella and King Ferdinand. "Kidnapped by Columbus" is the fictional-largely accurate-historical account of the "Indians" voyage to the Old World told through the eyes of a fourteen-year-old Native American. Columbus and his "Indians" returned to Spain at the height of the Inquisition, in the wake of the expulsion of all Jews and the final defeat of Islam in Europe. The "Indians" encounter some of the most prominent figures in history-Isabella and Ferdinand, Grand Inquisitor Tomás Torquemada, Catherine of Aragón, the ill-fated Prince Juan, and Pope Rodrigo Borgia,

who issues Papal Bulls changing the boundaries of the Western Hemisphere to this day. "This cinematic novel contributes greatly to the debate over how the historical figure of Christopher Columbus should be judged today. It's a captivating read that serves as an interesting introduction to the time when the Spanish Empire was ascendant, detailing an exciting event that is under-reported by history. It puts the reader into the shoes of a native who was controversially plucked from the shores of the New World and taken to the Old World, as the globe shifted from the Pre-Columbian Era to Post-Columbian Times. But most of all it's an arresting page-turner and a good old fashioned action-packed adventure tale."-Robert Silverman, Editor-in-Chief, StatePoint Media, Inc. "This fascinating novel offers a historical perspective of the times of discovery of the New World from the eyes of a Taíno-the first natives who Columbus encountered-which gives a humanly touch and new understanding of this native culture. Marc Wilson recreates the compelling story of Enriquillo, a great leader of the natives in the Spanish conquered islands in the Caribbean, and who became a prisoner of Spain. His tale articulates a unique reality never shared before as it delves in the relationship between the native captive and the Spanish captor."-Salvador Habún, El Vocero. P.R. Marcus (Marc) Wilson is a journalist who worked for three daily newspapers, five bureaus of The Associated Press, and was editor and publisher of the "Bigfork Eagle," a weekly newspaper in northwestern Montana. For decades the crown jewels of Japan's postwar manufacturing industry, motorcycles remain one of Japan's top exports.

Japan's Motorcycle Wars assesses the historical development and societal impact of the motorcycle industry, from the influence of motor sports on vehicle sales in the early 1900s to the postwar developments that led to the massive wave of motorization sweeping the Asia-Pacific region today. Jeffrey Alexander brings a wealth of information to light, providing English translations of transcripts, industry publications, and company histories that have until now been available only in Japanese. By exploring the industry as a whole, he reveals that Japan's motorcycle industry was characterized not by communitarian success but by misplaced loyalties, technical disasters, and brutal competition.

The book traces the development and combat history of the twin-engine, twin-boom, Lockheed P-38 Lightning from the first flight of the XP-38 in January 1939 through a succession of models, ending with the electronic-laden, two-seat P-38M. Created on the drawing boards of two of America's most notable aircraft designers - Hall Hibbard and Clarence 'Kelly' Johnson - the P-38 Lightning was the only U.S. pursuit plane to remain in continuous production throughout WWII. In the Southwestern Pacific, the P-38 served as the U.S. Army Air Force's primary long-range fighter prior to the arrival of the P-51D Mustang. Top American air aces and Medal-of-Honor winners Richard Bong and Thomas McGuire both flew Lightnings, and it was a P-38 that brought down Japanese Admiral Isoroku Yamamoto's plane in April 1943. The Lightning saw service in Europe too, and it was after flying a P-38 to assess the progress of the Normandy Invasion in 1944, that U.S. Lt. Gen. Jimmy Doolittle referred to the Lightning as "the sweetest-flying plane in the sky." Illustrated with more than 150 period photographs, a third of them rare original color photos, plus color profiles and detailed line drawings.

### **How to Improve Triumph TR7, TR7-V8 & TR8**

The post-9/11 world has witnessed a rebirth of irregular and asymmetrical warfare, which, in turn, has led to an increase in conflicts between conventional armies and non-state armed groups. In their haste to respond to the threat from insurgencies, nations often fail to plan effectively not only for combat operations but also for withdrawal, which is inevitable, win or lose. In order to answer the question of how to withdraw from engagement with an insurgency, Gleis examines how insurgencies are conducted and what, if anything, is unique about an Islamist insurgency. He then proposes ways to combat these groups successfully and to disentangle one's military forces from the war once strategic objectives have been met--or once it is clear that they cannot be. Because this type of warfare is dynamic and ever-changing, this book is not meant to suggest a set of cookie-cutter solutions for how to withdraw from insurgencies. Rather, the author analyzes six counterinsurgency operations that have taken place in the past, with the intention of gleaning from them as many lessons as possible to better prepare for future withdrawals. The literature on how wars end has failed to explore irregular warfare. This much needed reexamination serves as an indispensable starting point.
